Testimony Sept 13, 2014

I believe we, the State of Idaho, should take the management of Federal lands back to be managed by the State.

My concern & plea is to keep these lands for all Idaho citizens for multiple use. Do not sell off or trade for commercial purpose. I believe the county commissioners should have a strong voice of the management of the lands in their respective counties.

Logging should be permitted & yet managed with stringent authority of the commissioners to protect the environment. We need control to realize funds to fund our schools & provide employment in our counties. We need to manage our natural resources & stop wasting these resources. We need access to snowmobile, horseback riding, hiking, wood cut & huckleberry & not have wilderness that the US Forest Service seems to wants to manage by fire & blocking off.

Respectfully Submitted
