

STATEMENT OF PURPOSE

RS24246C1

Different communities have different technical, academic, and professional development needs; our community college system should reflect this diversity. To that end, the purpose of this legislation is to ensure representation that is distributed evenly throughout a community college district. The bill utilizes the same processes for zoning and rezoning within the district that Idaho Code already requires of school districts. Additionally, in the event a community college seeks to expand, this bill appends the existing process of seeking State Board of Education approval by adding the rezoning plan to the request for approval.

FISCAL NOTE

There is no General Fund impact and a de minimis impact on community college districts.
