

STATEMENT OF PURPOSE

RS25771C1

To establish in the Office of the Governor the Office of Information Technology Services. This office will oversee and coordinate implementation of information technology services and cybersecurity policies within the State of Idaho. The existing information technology services functions currently performed by the state's Department of Administration would be transferred to this new office to facilitate consolidation and efficiency of IT services and cybersecurity efforts across all state agencies.

FISCAL NOTE

There is no fiscal impact to this proposal as these are existing functions within the state. While new line item requests are included in the Governor's budget recommendation for the new Office of Information Technology Services, these were line item requests submitted by the Department of Administration for support of IT services and cybersecurity processes.
