

## STATEMENT OF PURPOSE

### RS24633

The purpose of this legislation is to modify the requirement for election judges to post a correct copy of elections results at a polling place. Modern polling place counters, which tabulate ballots electronically, deliver more efficient and timely results, making official results available the same calendar day as the election and eliminate the need for an official copy of election results to be posted at a later date.

### FISCAL NOTE

There is no fiscal impact at the state or local level. This procedure will actually save taxpayer money and will save time spent to post the result of each polling location after the election date.
