

STATEMENT OF PURPOSE

RS24948

Currently, Idaho statutes (Section 54-1016) provide for property owners to do their own electrical work in their primary residence or associated outbuildings of the homestead without requiring the property owner to be licensed for electrical work. The current statute does not provide for property owners to do their own electrical work "on" their residence or outbuildings, however. This bill will fix the technicality and also permit homeowners to do electrical work in or on their residence, outbuildings and the land as well (for example, install a light for a flagpole or walkway).

FISCAL NOTE

There is no fiscal impact to the state General Fund because this is a regulatory change and requires no additional oversight by any state agency. It has no fiscal impact because the amendment is consistent with current legislative practices.
