

STATEMENT OF PURPOSE

RS24875

Section 33-133, Idaho Code, specifies student data privacy requirements. Proposed amendments would provide clarification regarding the definition of personally identifiable student data and the combination of data elements that allows for the student to be identified as opposed to data elements that, when used as a standalone data set, cannot be tied back to a student; amend terms used in Section 33-120, Idaho Code to make them consistent with terms used in Section 33-133, Idaho Code; clarify rulemaking provisions including data quality/misreporting provisions, and make additional technical corrections.

FISCAL NOTE

There would be no fiscal impact from the proposed legislation. The proposed amendments add additional language to assure that proper safe guards of student data are in place, consistent with current practice, and result in no additional impact over the current requirements of these sections.
