

STATEMENT OF PURPOSE

RS26495

The purpose of this bill is to make various codifier corrections and technical corrections to the Idaho Code. In terms of the codifier corrections, the codifier, in compiling the new laws that are passed every year, occasionally finds minor changes that should be made. They notify our editors of the code sections affected and then we include those code sections in our yearly codifier bill.

These codifier corrections often are due to the enactment of multiple amendments to a particular code section, chapter or title during a previous legislative session. Conflicts due to multiple amendments are indicated in brackets in the Idaho Code by the codifier. This method of indicating codifier corrections is often confusing to the reader.

In terms of technical corrections, those corrections are identified by the Legislative Services staff and include changes involving lower and upper-case changes, grammar and punctuation.

Sometimes codifier and technical corrections are made the next time an affected code section is amended. However, rather than waiting for future amendments to the various sections included, this bill addresses those changes.

FISCAL NOTE

There is no fiscal impact as a result of this bill. The actions necessary to compile the bill are already being performed by full-time LSO staff in the course of their duties. The only additional cost would be the cost involved to print the bill. We estimate that cost to be roughly five cents per page. The bill is 24 pages long. We generally print 51 copies resulting in a cost of \$61.20. The costs are all fixed costs built into the budget.
