

## STATEMENT OF PURPOSE

### RS27010

This legislation modifies the quantities provided regarding heroin in our drug trafficking statute and the sentences involved. These changes will help provide that the trafficking statutes are applied to those participating in drug distribution and sales instead of those engaging solely in personal use. The sentencing time frames are being modified to more closely correspond to other controlled substances in the statute. Fentanyl and its derivatives are described as being 100 to 1000 times more potent and dangerous than heroin. It is being added to the trafficking statute.

### FISCAL NOTE

Legislation could have a neutral impact to the General Fund or to any other government fund because some criminal cases could increase while some could decrease. Trafficking in heroin cases could go down due to the fact that the amount of heroin is being raised from 2 grams to 5 grams in the bottom tier. Furthermore, the amount of prison time for the middle tier is being dropped from 10 years to 5 and the top tier is being dropped from 15 years to 10. Adding Fentanyl to the mandatory minimum statute could increase trafficking cases but any costs increase cannot be quantified at this time.
