

REVISED

STATEMENT OF PURPOSE

RS29227 / S1283

The purpose of this legislation is to establish provisions regarding supplemental Medicaid reimbursement for Ground Emergency Medical Transportation. Ambulance services provide more uncompensated care than any other major health care provider. Currently, Medicaid only reimburses approximately a quarter of the true cost of ground emergency medical transport. Supplemental reimbursement would help to further cover the true cost of emergency medical services and greatly benefit rural areas with less access to emergency medical care, without a cost to either the state or local municipalities.

FISCAL NOTE

There will be a minimal impact to the General Fund of \$56,000 annually for one FTE to administer this program. An eligible provider as a condition of receiving supplemental reimbursement pursuant to this legislation shall enter into, and maintain, an agreement with the Division of Medicaid for the purposes of implementing this legislation and reimbursing the department for the costs of administering this program. This will require federal funds spending authority with an estimated impact of \$20 million dollars annually.
