Introduction

The Fifty-eighth Legislature of the State of Idaho passed House Concurrent Resolution No. 62 authorizing the Legislative Committee on Energy, Environment, and Technology to develop an integrated state energy plan. To accomplish the task, the committee has submitted for bid, a request for information from consultants to help them in its development. In its request, the committee wants qualified vendors to include:

- An explanation of alternative approaches that the consultant feels could be taken by the committee to frame a state energy plan.
- A description of the steps that the Interim Committee should take during the next (8) months toward developing a state energy plan.
- A detailed statement of the Consultant's approach to the specific project, including a breakdown of specific services the consultant proposes to offer the committee.
- A cost estimate broken down by each discrete segments of proposals of the consultant's proposed services.
- Basic data relative to the consultant's organizational structure, history, personnel, special expertise and general credits.
- A list of the resources expected to accomplish the work including the amount of their involvement and responsibilities, and their qualifications.
- A list of the consultant's clients over the past five (5) years.
- A description of all Idaho projects in which the consultant has been involved and all projects with Idaho-based clients.
- Provide a list of at least five (5) projects, with brief descriptions, including the entity for which the consultant performed the services, demonstrating ability of the consultant to complete projects of similar scope.
- Examples of state energy plans the consultant has prepared or helped to prepare.

The development of a state energy plan has the potential to create significant disagreements between multiple parties whose interests could be affected. Some of these interests include agriculture, industry and commerce, public health, natural resource conservation, and the environment to name a few. The process for developing the plan must address different types of issues. These issues include: allocation of resources; the social and psychological issues of trust, respect, and equity between the different parties; and who is included in the decision-making and who is not. If these issues are not addressed, the plan may suffer in its perceived legitimacy. Conflicts may continue making it difficult to formulate policies for the plan's implementation.

The development of a plan will also require a significant investment in understanding a vast body of complex and technical information. Energy has far reaching implications and consequences to the economy, the environment, and to society in general. It's intrusion into other traditional Idaho policy areas (e.g. water, land use, etc.) can be significant. In addition to the complex information surrounding the issues and

technologies, there may be a lack of information, misinformation, and significant differences in perspectives and interpretation. It is important that the structure, processes and forums used for deliberating on the information are properly constructed and moderated to insure all sides are understood. Even if the views are divergent or not in agreement, then relevance and priority can be determined.

Lastly, there will also be significant organizational or 'turf' issues. Issues dealing with existing laws that may overlap and conflict with one another are to be expected. For example, multiple jurisdictions and governmental agencies involved may have competing missions. Which goal or mission has priority? There may also be multiple opportunities for appeal. And, most importantly, there is the question of who gets to decide what.

Alternative Approaches

Several alternative approaches could be used to formulate a state energy plan. None can be considered the 'one best way'. The selection of an approach will depend on which criteria decision-makers use to define success.

One model that could be used is command and control. The Interim Committee could solicit input from different agencies, interest groups and stakeholders, and develop the plan from within the committee. This approach, a trustee model of representation, relies on those selected to the committee to use their judgment and wisdom to make decisions. Efficiency is the biggest benefit of this approach although the most influential interest groups may tend to dominate in this model.

A second approach may be to delegate the tasks of developing a plan to scientific experts. This approach places more emphasis on facts and rational discourse. Expert knowledge plays a significant role by helping to define and analyze problems and to understand the connections of a particular issue. However, arguments based on a scientifically credible expert can also be a "Trojan Horse," cloaking and framing a value-laden position without revealing its true intent. This can be especially problematic since the voice of an expert brings it increased power and weight. If facts are competing, the "science" can then become politicized creating a focus on the disputed facts instead of focusing on a meaningful deliberation of the underlying interests. Importantly, a true expert centered approach does not represent the "values" side of the equation. Facts and expert opinion are only one piece of policy decision-making. Mere facts and expert opinion may not represent the diversity of issues required to implement a robust policy that maximizes the "public's interest."

We propose a third approach to develop an Idaho energy plan that heavily involves the citizenry of Idaho. Several events can be conducted throughout the process of developing the plan that allow for public participation and deliberation. Citizen deliberation, collaborative polling citizen juries, and other forms of citizen participation have the benefit of perpetuating the participatory right of citizens in a democratic polity. Second, it provides a measure of accountability and ensures policies are in the spirit of the public's interest. Third, involvement by citizens will ensure a better plan. Public participation provides more robust plans and policies that address the issues affecting a diverse citizenry. Finally, public involvement will increase the likelihood of citizen commitment to elements of the plan that the citizens were involved in developing. In our proposal, citizen involvement is not defined by public hearing and comment gathering processes. While significant potential benefits can be realized from public hearings, these types of activities can be time consuming, expensive, and dominated by extreme positions.

Recommended Steps

The “Background and Scope of Work” section of the Request for Information (RFI) states that the Idaho Legislative Council Interim Committee on Energy, Environment and Technology should “involve representatives of local government, business, agriculture and industry, the environmental community, the health care community and state agencies in its study and inquiry”. In addition, the RFI asks that the “Energy Consultant” “work with the Interim Committee and the staff of the Legislative Services Office to gather information from the stakeholders and from public and private sources”.

While such requirements are easy for everyone to support, they can be met in a number of ways. To us, the *process* by which the public, and others with a stake in the development of an Idaho State Energy plan, are consulted and listened to will be vital to final acceptance and support of the state’s plan. If the process is viewed with suspicion or is challenged, then the likelihood of successful implementation will diminish greatly. Thus, it is our view at the Energy Policy Institute (EPI) that the process be open, inclusive and statewide. It should encourage thoughtful public deliberation over the choices facing Idahoans. Abraham Lincoln said, “Public sentiment is everything. With public sentiment, nothing can fail. Without it, nothing can succeed. Consequently, he who molds public sentiment goes deeper than he who enacts statutes or pronounces decisions.” Add to this a caution from Theodore Roosevelt, who believed in leading public sentiment. “If I try to drive public sentiment I shall fail, save in exceptional circumstances.”

The task before the Interim Committee is to employ a process that will lead, but not drive, public participation and deliberation to ensure Idaho’s energy future. EPI is proposing that the process include steps that are suited to do the former rather than the latter.

Scope of Work

The Energy Policy Institute (EPI) is proposing to complete one or more of the following deliverables that it considers within the range of its capabilities. We think of these as “stand alone” modules that may or may not be of interest to the committee. However, due to resource capacity constraints, EPI would only complete a subset of the list. It is expected that if the committee is interested in any of these deliverables, that they will further negotiate to determine a priority of services they wish EPI to perform. EPI is fully prepared to partner with other consultants and the Committee to integrate its services into an overall process leading to the successful development of the plan.

Citizen Deliberation

Purpose: Citizen Deliberation is designed to involve the citizens of Idaho in setting the energy policy future. Modeled after the successful local/national partnership event hosted by BSU in October of 2004, citizens at the local level, from across the state, are polled about energy issues. Based on the issues and interests of their locality, participants are informed and educated about energy options, technologies and issues. Through facilitated dialogue, citizens contribute their beliefs and values, perceptions, attitudes, and preferences about energy technologies and issues. The outcomes would inform the committee’s work on policy choices in the context of the state’s diverse needs and desires. Citizen deliberation provides a robust and rich context for policy setting, which leads to a high level of engagement and awareness by citizens of energy policy issues, and contributes to less divisive implementation.

Description: A number of regional deliberative events are proposed across the state. We recommend six. Chosen from a random sample of Idahoans, participants would be polled for initial attitudes and perceptions on key energy issues. Carefully balanced background materials, distributed prior to the actual event, would inform and educate participants on the options, technologies and issues. Citizens then come together at a central location for a day of deliberation on those issues. Expert panels inform and answer questions, facilitated discussions provide a forum to delve into the issues and concerns of participants, small group discussions allow citizens to consider alternative points of view, and periodic surveys chart the course of beliefs, attitudes and concerns. These surveys, taken throughout the day are used for comparison with the pre-event benchmark survey to assess the willingness of citizens to understand alternative viewpoints, and potentially to come closer, or to consensus. In this way, legislators would know the preferences and concerns about energy issues of their constituents, by region, to guide policy formation. Additionally, legislators would understand the education required to inform citizens when policy choices are made. The appendix contains reference materials about the citizen deliberative process and links to sites of interest.

EPI staff and BSU faculty would provide all services necessary to implement the desired regional mix of citizen deliberations. This includes: consultation on methodology, questionnaire design, background material development, random sampling process, process and protocol design, facilities and facilitation resources, general project management, management of any subcontractors, quality control, compilation and data analysis, production of a technical report, documentation of each deliberative event, a complete data set, a final report for presentation, and an overall synthesis of citizen priorities for Idaho's energy plan.

Timeline: Development and preparation generally requires about four to eight weeks prior to any event. The field period length is determined by the number of events chosen. Preliminary data analysis generally requires two to three weeks after data is compiled.

Costs: Cost for services and deliverables is estimated between \$125,000 and \$180,000 for up to six regional events. (Some expenses are variable depending upon the number of events, locations, overall project timeline and complexity desired. Re-estimation is assumed once these elements are known.)

Resources: The Public Policy Center at BSU would provide the expertise and implementation for this deliverable. Drs. James Weatherby and Stephanie Witt will provide direction and oversight of this project. Project implementation will involve faculty proficient in the policy process, and in citizen contribution to the democratic deliberation process. Additionally, teams of faculty from across Idaho's university system and other subject matter experts will assist. Graduate researchers and EPI staff will administer the events, analyze the data and prepare the reports.

Surveys

Purpose: To understand the beliefs and values of Idaho's citizens, we propose to provide a survey of Idaho adults to assess their perceptions, attitudes, and preferences about proposed alternatives that could be potentially included in the plan. A survey could also be performed to gather information relative to alternatives that could be considered. The survey findings would inform the committee's work on policy choices, and would, at a minimum provide issue specific citizen input to the process of developing a statewide energy plan.

Description: A random sample to generate approximately 500 completed surveys would be administered to adults (persons 18 years of age and older) who reside in Idaho. The survey would be conducted by telephone using random digit dialing by a qualified vendor proficient in the use of CATI (define this term). A balance of open and closed-ended questions may be used. A recommendation would be made on the mix and trade-offs as the issues to study become defined. Tradeoffs may be considered to keep survey expense manageable, and a length, on average, of 10– 12 minutes to complete.

Services we supply include: consultation on methodology, questionnaire design, sampling process, protocol design, general project management, management of any subcontractors, quality control, data analysis, production of a technical report, complete data set(s), and a final report for presentation.

Timeline: Survey development and preparation generally require about two to three weeks. The field period length (time from test of instrument to completion of adequate interviews) is estimated at about two to four weeks. Re-coding of open-ended response data, data quality assurance and preliminary data analysis may require up to three weeks after data is compiled. Some tasks may run concurrently, but the overall process usually takes from twelve up to fifteen weeks.

Costs: Cost for services and deliverables is estimated between \$32,500 and \$45,000, depending upon options chosen, overall survey length and complexity.

Resources: The Social Science Research Center (SSRC) at BSU would provide the expertise and implementation for this deliverable. Carole Nemnich, Projects Manager would be the project lead (resume in Appendix A). Dr. Jim Weatherby, acting Director and other faculty may consult on the project as needed. Graduate Researchers from the Masters in Public Administration program may be involved in data analysis and reporting.

Energy Conference

Another tool to insure public deliberation and education, as well as raise the visibility of energy and the development of the energy plan is the public conference. We propose to hold an Andrus Center styled conference at the appropriate point in the plan development process. The cost of the conference is approximately \$80,000 with the goal of raising at least half the cost of the event through sponsorships and grant support.

Organizational Structure Assessment

Purpose: An organizational structure assessment will provide the committee with an understanding of gaps and overlaps in roles and responsibilities within and between government agencies and other entities responsible to plan, execute, and regulate Idaho's energy infrastructure. It would also identify issues of mission alignment that can lead to poor organizational and implementation effectiveness. This assessment will help the state consider the best organizational arrangements for implementing its energy policy plan.

Description: To perform the assessment, EPI would perform multiple interviews across agencies to understand current organizational missions, roles, and responsibilities. It

would then perform an analysis and summarize its finding for submission to the committee.

Timeline: Development of a questionnaire would require 1 week. Interviews could take between 2 and 3 weeks depending on the number of interviews required. An analysis of the data and development of a report would take an additional 2 weeks.

Costs: Estimated cost of this deliverable would be between \$10,000 and \$20,000 depending on the number of interviews conducted and complexity.

Resources: Mike Louis, Assistant Director of the Energy Policy Institute would serve as project lead for this deliverable with consultation from Dr. John Freemuth. Graduate researchers from the Masters in Public Administration program would perform most of the assessment activities and write-ups.

Energy Policy Institute Organization and Qualifications

Mission

The Energy Policy Institute's (EPI) overall goal is to lead a comprehensive national, international, and regional dialogue on energy policy issues. The issues in this dialogue will span the range of those encountered in our consideration of the energy future of the nation, including consequences and impacts to the economy, society, natural resources, and the environment. EPI will assemble a community of interested parties, and by utilizing the latest collaborative problem-solving and decision-making methods and tools, map the values and trade-offs involved in defining and solving the nation's energy-related problems. The output of these discussions along with the research conducted under EPI's guidance will provide policy-makers, citizens, and other interested parties with relevant and timely information to guide the development of energy policy.

EPI will also be involved in educating and preparing tomorrow's leaders in the importance and application of energy policy in determining the nation's future energy mix. Students participating in the Institute's research and seminars will gain a real-life appreciation of the role that political decision-making has in energy-policy as well as the fundamental principles involved.

Organizational Structure and History

The Energy Policy Institute (EPI), under the direction of Dr. John Freemuth, is organized under the Center of Advanced Energy Studies (CAES). CAES operates as a distributed institute between the state's three universities, and the INL. Although EPI and CAES were both founded less than one year ago, the institutions from which they were both conceived have decades of experience and established expertise.

EPI coordinates its mission between all partners through the Public Policy Center and the Department of Public Policy and Administration at Boise State University. The Public Policy Center houses four centers that provide research and outreach services to the public and nonprofit sectors. The center has expertise in policy research and analysis, public management development, survey and evaluation research for the public sector, technical assistance on public finance issues, government sector information, training and handbook development, and conflict resolution management. Under the Direction of Dr. James Weatherby, the Center has grown since its recognition by the State Board of Education in 1997, addressing key issues of policy and implementation in government. Dr. Stephanie Witt, currently Associate VP for Academic Affairs, will assume the Directorship of the Center in July 2006.

These relationships provide EPI with access to extensive resources and capabilities that are synergistic to guiding the development of sound energy policy. For example, EPI will draw upon the expertise contained within the Social Science Research Center (SSRC) which is also housed within the Public Policy Center. The SSRC has over 20 years of experience conducting public policy research serving governmental entities and the public by fulfilling obligations for public input through the use of surveys and other innovative methods. The SSRC has also conducted numerous program evaluations for the public sector. This experience and expertise will be invaluable to completing the deliverables contained within this proposal.

Resources

John Freemuth – Consultant and Overall Project Oversight

John C. Freemuth is Interim Associate Director of the Energy Policy Institute, Senior Fellow, Cecil D. Andrus Center for Public Policy, and Professor of Public Policy and Public Administration, Boise State University, where his emphasis has been in environmental, natural resource and public land policy and administration. He is the author of an award-winning book, Islands under Siege: National Parks and the Politics of External Threats (University Of Kansas, 1991) as well numerous articles on environmental policy. He is also the author of six Andrus Center white papers based on Center conferences. He was chair of the Science Advisory Board of the Bureau of Land Management, where he worked on policies to improve the use of scientific information for land managers as well as improve the relationship between science and democratic decision processes. Dr. Freemuth was named the Carnegie/CASE Professor of the Year for Idaho in 2001.

Leslie Alm – Consultant and Project Oversight

Leslie R. Alm is Professor and Chair of the Department of Public Policy & Administration at Boise State University, and is the Director of the Master of Public Administration program. His research interests are in state and local politics in the West, environmental policy making, and U.S.–Canada relations. He has recently published articles in *Journal of Borderlands Studies*, *The American Review of Canadian Studies*, *The Social Science Journal*, and *State and Local Government Review*, and his book *Crossing Borders, Crossing Boundaries: The Role of Scientists in the U.S.–Canadian Acid Rain Debate* was recently published by Praeger Press.

Stephanie Witt – Consultant and Project Oversight

Stephanie Witt is Associate Vice President for Academic Affairs and a Professor of Public Policy and Administration at Boise State University. Her research interests include issues related to state and local government and public policy. Her most recent

book is *Human Resource Management in the Public Sector* published by Houghton Mifflin publishers. A second book, *Public Administration: Knowledge and Skills for Public Service*, is forthcoming from Houghton Mifflin. Her work has appeared in journals such as *State and Local Government Review*, *Public Administration Review*, *American Politics Quarterly*, and *Review of Public Personnel Administration*. Witt received her Ph.D. from Washington State University in 1989.

Gregory Hill – Consultant and Project Oversight

Gregory Hill is Assistant Professor of Public Policy & Administration and Director of the Applied Research Program. He completed his Ph.D. at Texas A&M University in 2006. He earned his MPA from Idaho State University. His interests center on public management, administration, and policy theory. He has written articles for *The Oxford Handbook of Public Management* (2005) and the *Journal of Public Administration Research and Theory* (2005) and has presented papers at several conferences including the annual meetings of the Southwest Political Science Association (2003) and the Midwest Political Science Association (2004). His research centers on the influence of constituents on governance.

Michael Louis – Project lead

Michael Louis is currently the Assistant Director of the Energy Policy Institute. He has over 20 years of experience developing and leading major strategic initiatives and has over 12 years of management experience in the electronics manufacturing industry. He has also started and successfully ran his own consulting business giving workshops on *Becoming a High Powered Change Leader through “Mission-Directed Teams”™* and presentations on *Leading High Leverage Change* at the Miami, Institute of Industrial Engineers annual conference. He has also made presentations on work system design at the Work in America, Institute conference in Phoenix, Arizona. His expertise includes: strategic planning, enterprise system development and implementation, organizational design and development, process development and improvement, project management, and engineering economics. He has a Bachelors and Masters degree in Industrial Engineering from Purdue University and his MPA from Boise State University. While getting his degrees, he has completed projects in Demand-side Management for the electric power industry and led the development of the 16th Annual Public Policy Survey for Boise State University.

Carole Nemnich – Project Lead

Ms. Nemnich is the Projects Manager of the Social Science Research Center at BSU. She has over 20 years of experience in the private, public and nonprofit sectors. In her current capacity, she oversees the day-to-day operations and management of the SSRC, serves as project lead and principle investigator on projects, and supervises

graduate students performing research in the center. Her areas of expertise include strategic planning, research, communications, collaboration, quality management, and nonprofit capacity building. She is an adjunct professor at BSU. Nemnich received her MPA from Boise State University in 2004 and a BBA in Economics, also from BSU in 1986.

Previous Experience

- Annual Idaho Public Policy Survey (April 2006). The annual policy survey is provided to Idaho's policy makers and interested citizens every legislative session. The survey is sponsored by the College of Social Sciences and Public Affairs. The 17th Annual Survey includes a variety of citizen perceptions on energy policy issues. (See Appendix C)
- Awareness and Perception Survey of Idahoans (October 2005). The Idaho National Laboratory (INL) commissioned this study to understand the attitudes and perceptions of Idaho citizens about the new mission of the INL and some of INL's specific programs. Additionally, the study provides detail on the value and uses of various information sources used by citizens.
- Energy Policy Institute Strategic Startup Plan (September 2005). The INL and BEA sponsored a project to develop a plan for the successful startup of the Energy Policy Institute. The plan was used to develop a program plan for the Department of Energy's budget proposal for the Center of Advanced Energy Studies (See Appendix C).
- Assessment of Idahoans with Disabilities (May 2005) The State Independent Living Council and the Idaho Department of Vocational Rehabilitation commissioned a broad study of Idaho adults to determine the incidence of various disabilities across the population. The survey also measured the issues and concerns of the state's adult disabled. This project required coordination of a multitude of agencies, advocacy groups, service providers and other stakeholders.
- Evaluation of Idaho Court Pilot Programs (Phase I: Evaluation of the Third District Guardian Ad Litem Program) (Draft in progress for May 2006 release.) Process and outcome evaluations on a variety of 'problem solving' courts for the Idaho Supreme Court Administration. Deliverables include a 'template' approach to future evaluations for new or expanded programs.
- Survey of Idaho Workforce Development (August 2004) The Idaho Department of Commerce and Labor commissioned a study of the detail of the programs provided by 32 agencies across the state for Workforce Investment Act programs and the flow of WIA funds. State and federal agencies and local workforce development councils were interviewed. Service delivery and the flow of funds were mapped by source and target audience for the client.

- Other projects for the state. The SSRC has worked for many of Idaho's agencies over the past 20 years. These include: Idaho Department of Health and Welfare; the Idaho Department of Education and Division of Professional/Technical Education; the Idaho Department of Transportation; the Idaho Department of Parks and Recreation; the Idaho Department of Fish and Game; the Idaho Department of Environmental Quality; the Idaho National Engineering and Environmental Laboratory; the Idaho State Library System; the Idaho Department of Commerce and Labor; the Idaho State Controller's Office; the State Independent Living Council; the Idaho State Tax Commission; and various other agencies, offices and departments.
- Other projects for regional/local governments include: the City of Boise; Ada County Planning; Meridian Police Department; Valley County; among others.
- Property Tax Summit and Proceedings (October 2005). Nationally recognized property tax experts convened to discuss issues and the future of the property tax in Idaho with interested state, local and regional parties. Co-sponsors were the Idaho Tax commission, Associated Taxpayers of Idaho, and the Idaho Association of counties. A cross-section of policy makers, interested citizens and opinion leaders participated.
- Municipal Clerks and Treasurers Conference (Mountain West Region, March 2006). Annually, the Center hosts city clerks, finance officers and treasurers in training geared specifically to their needs. The Center's Elected County Officials Handbook is available after each election and is used as a text. The Institute is certified by the International Institute of Municipal Clerks and the Association of Public treasurers for accreditation.
- Deliberation Day (October 2004). In a local/national partnership with McNeil/Lehrer Productions, PBS, Idaho Public TV, The Idaho Statesman, The Idaho Press Club, and the Idaho League of Women Voters, BSU hosted a day-long "town meeting" with 117 southern Idaho citizens. This was one of 17 events held across the country. Moderated panels and informed discussion allowed participants to make thoughtful, reasoned conclusions on issues of importance.
- Idaho Candidate Forum (August 2004). County commissioners and legislative candidates across southern Idaho participated in a day-long event to learn about state and local budgeting, financial trends, public opinion, and other topics of interest to potential, newly-elected officials.
- The Center has provided policy analysis and recommendations to Idaho's state and local governments since its inception. Following are a few projects of note prior to 2004. Continuing the Public Dialogue on Idaho's Tax Policy was funded by a Northwest Area Foundation grant to provide opportunities for citizen involvement in tax policy discussions and to include the taxpayer in decisions about taxes.

Project activities included 14 separate group discussions involving diverse groups of citizens from across the state. Other Idaho-specific projects requiring coordination across agencies and the public include: Treasure Valley Infrastructure Project and Infrastructure Inventory Project (for Idaho) funded by the Future Foundation and the Growth Management Institute; Ada County Highway District Fiscal Capacity Study; Idaho Kids Count Data Handbook Project (funded by the Annie E. Casey Foundation); Idaho Municipal Source Book; State Assistance on Capacity Development (funded by US EPA); and many others.

- Other past projects have included a variety of surveys for the Idaho Power Company and other quasi-public entities to gauge public perception of market need, and program service and delivery.

Appendix A: Resumes and Vitae

CURRICULUM VITAE

John Carter Freemuth
Department of Political Science/
Master of Public Administration Degree Program
Boise State University
1910 University Avenue
Boise, Idaho 83725
208-426-3931
jfreemu@boisestate.edu

I. EDUCATION

- 1972 B.A. Pomona College, Claremont, CA.
1975 M.A. Claremont Graduate School, Claremont, CA.
1986 Ph.D. Colorado State University, Fort Collins, CO.

II. ACADEMIC AND ADMINISTRATIVE EXPERIENCE

A. Academic Positions

Visiting Assistant Professor. 1986-1987
Department of Political Science and Master of Public Administration (MPA)
Program, Boise State University, Boise, ID.

Assistant Professor. 1987-1991
Department of Political Science and Master of Public Administration (MPA)
Program, Boise State University, Boise, ID.

Associate Professor, with tenure. 1991-
Department of Political Science and Master of Public Administration (MPA)
Program, Boise State University, Boise, ID. Also appointed affiliate faculty member,
College of Forestry, Wildlife, and Range Sciences, University of Idaho, in order to
serve on occasional doctoral committees.

Professor. 1996-
Department of Political Science and Master of Public Administration (MPA)
Program, Boise State University, Boise, ID.

Senior Fellow, Cecil D. Andrus Center for Public Policy, Boise State University,
1997-

B. Courses Offered

Undergraduate

- a. American National Government (Interactive-TV in 1995)
- b. Introduction to Public Administration
- c. Legislative Politics
- d. Parties and Interest Groups
- e. Environmental Politics (Radio, 1997)
- f. Public Land Policy (summer, 1995)
- g. Honors Seminar: Yellowstone: Nature and Culture

Graduate

- a. Introductory Seminar in Public Administration
- b. Seminar in Public Organization Theory
- c. Seminar in Natural Resource and Environmental Policy and Administration
- d. Seminar in Public Land Policy and Administration
- e. Seminar in the Theory and Practice of Public Participation
- f. Seminar Public Policy Process

C. Administrative Experience

Acting Chair, Department of Political Science Fall, 1999

Internship Coordinator, MPA Program, Boise State University. 1986-1989

III. PUBLICATIONS

A. Books

Environmental Policy and Politics in the West (edited book with Zachary Smith) under review University of Colorado Press

Islands Under Siege: National Parks and the Politics of External Threats (Lawrence, Kansas: University of Kansas Press, 1991). Named an "Outstanding Academic Book" by Choice magazine, 1992.

B. Articles and Book Chapters

"The Antiquities Act and Alaska" (with Cecil Andrus), University of Arizona Press, (forthcoming, 2006)

"Understanding the Politics of Ecological Regulation: Appropriate Use of the Concept of Ecosystem Health", in Rappaport, et. al. Managing for Healthy Ecosystems (2003, Lewis Publishers)

“Biocentric Public Administration: Just Another Wolf in Sheep’s Clothing?”
Administrative Theory and Praxis (April, 2001)

“Where Do We Go From Here?” in Under Fire: The West is Burning (Billings: Fenske Press, 2001) (not refereed)

"Public Land Policy," 1986 Colorado State University Reunion Lecture series (April, 1986).

E. Funded and Contract Research

Office of Senator Larry Craig: Environmental Science and Public Policy Institute, co-principal investigator) \$250,000 (2002,4); \$500,000 (2003)

Hewlett Foundation: 2 grants to the Andrus Center for Public Policy, \$250,000.

Faculty Service to Profession Award, 1997, \$231.

Analyst, Upper Columbia River Basin Scoping Process, Forest Service and Bureau of Land Management, 1995, \$1,000.

Outside Reviewer, "Institutional Constraints on Ecosystem Management", Eastside Project, Forest Service, \$350, and Institutional Barriers to Ecosystem Management, \$250.

"Ecosystem Management: Institutional Constraints Facing Public Land Managers," Idaho Higher Education Research Council Grant, 1992, \$23,000.

"A Comparative Analysis of Canadian and U. S. National Parks," Canadian Embassy Faculty Research Grant, 1990-91, \$4,200; Boise State University Summer Faculty Grants, \$3,200.

Hearing Officer and Hearing Report author, 1991 and 1996 Outstanding Resource Water nomination process, Idaho Department of Health and Welfare. \$9,000.

"Institutional Constraints on Demand on the White and Yampa Rivers" with Henry Caulfield, in Variability of Unutilized Surface Water Supplies from the Yampa and White River Basins, (Fort Collins, Colorado: Colorado Water Resources Institute, 1984, summer stipend).

G. Honors

CASE Professor of the Year for Idaho, 2001

Foundation Award for Service, Boise State University, 2001

Phi Kappa Phi—student nomination, 2001

Service to the Section award, Chair's award, Section on Environmental and Natural Resources Administration (SENRA), American Society for Public Administration

Nominated for Bricker (Foundation) Service Award, 1994

VI. PROFESSIONAL SERVICE

A. Board Positions

Member, National Science Advisory Board, Bureau of Land Management 1998-Chair 2000-2004

Member, Science Advisory Board, Greater Yellowstone Coalition, 1993-

Member, Science Advisory Board, American Wildlands, 1993-

Steering Committee, Idaho Environmental Forum 1996- Craters of the Moon Natural History Association, 1993-6

Wolf Education and Research Center, 1994-5

B. Miscellaneous Presentations and Service

Facilitator, National RAC Member Meeting, Reno, Nevada, 2004, 2005.

Keynote Speaker, Region 4 Integrated Resource Workshop, “Working together for Healthy Forests” Ogden, Utah, April, 2005.

Keynote Address, “The Relationship of the Public Lands to the States” at the joint federal leadership meeting: “Leadership Summit on Collaboration”, Albuquerque, New Mexico, February, 2005.

Panelist, Thomas S. Foley Public Policy Institute Forum, Washington State University, Vancouver, Washington, (May 1, 2001)

Presenter, BLM Foundations for Fire course, June 11, 2001

Speaker, Wild Idaho 2001 Idaho Conservation League, Redfish Lake, Idaho (May)

National Science Foundation Panelist, Graduate Research Fellowship applicant review, Washington, D.C. 2001

Moderator, Idaho Environmental Forecast 2001

Idaho Cattle Association, Executive Board meeting 2001

Boise School District, Equity Task Force member 2001

Moderator, Idaho Environmental Forecast 2000

Society of American Foresters, Legislative Breakfast meeting 2000

Instructor, Introduction to Fire Effects, National Interagency Fire Center 2000, 2001

Instructor, Fire Ecology and Ecosystem Management, National Interagency Fire Center 2000

U.S. Forest Service, Region 4, Lands Workshop (Mesquite, Nevada) 2000

BSU Native American/First Nations Conference, discussant 2000

Luncheon speaker, Montana Logging Association (Missoula) 2000

Natural Resources Focus Group, University of Idaho 2000

Guest column Idaho Statesman 2000

Leadership Boise 2000

“The Fires Next Time,” Cecil Andrus Center for Public policy, conference 2000

National Fire and Aviation conference, BLM 2000

Boise National Forest Leadership team meeting 2000

Idaho Cattle Association, state convention 2000

Idaho Rivers United 2000

Society for Range Management, national meeting 2000

Idaho Press Club fall meeting 2000

Globalization and the Environment conference, Environmental Resource Center, Sun Valley 2000

Invited speaker, USFS region 4 district ranger’s conference, St. George, Utah September, 1999

Invited speaker, Humbolt-Toiyabe NF, all-forest meeting, Winnemucca, Nevada April, 1999

National Fire Center conferences: Fire Management Policy, March, 1999, Introduction to Fire Effects, February, 2000,

BLM Oregon-Washington Management team meeting, Lakeview, Oregon August, 1999

Banquet speaker, National Park Service, Western Region Superintendent’s conference, Spokane, Washington, March, 1999

Keynote, “The Problem of Science and Politics” Sagebrush Steppe Ecosystems conference, Boise, June, 1999. Presentation to be published in proceedings.

Focused Interim Evaluation, graduate programs in Environmental Science and Management, University of Nevada, Las Vegas, 1999

Tenure Reviewer: Pomona College, Montana State University, University of Nevada, Las Vegas, Washington State University, 1993-96

NASPAA program review team, New Mexico State University, February, 1999

Moderator, speaker and report author, Predator-Prey Symposium, Boise, January, 1999.

Keynote address, “Is Environmental Policy getting too Dense?” Idaho Environmental Forum, January, 1997, printed in the June, 1997 issue of The Advocate, the journal of the Idaho Bar Association.

Reviewer, Strategic Plan, Craters of the Moon National Monument, 1997

Invited Presentation, “Cooperative Stewardship,” National Public Affairs meeting, Forest Service, Park City, Utah, May, 1997

Instructor, Fire Ecology and Ecosystem Management Training Course, National Interagency Fire Center, Boise, May, 1997, May, 1998

Invited guest, Idaho Forest Supervisor’s annual meeting, Sawtooth National Recreation Area, July, 1997.

Panelist, KAID-4, Public Television, “Dialogue” February (Fire Policy) and August (Open Space) shows, 1998, (Roadless Policy), 1999

Moderator, Keynote panel, “Idaho’s Public Lands “, Idaho Governor’s Conference on Recreation and Tourism, May, 1997, Pocatello

Moderator, Idaho Association of Counties panel on the Interior Columbia Basin Ecosystem Management Project, November, 1997, Boise

Invited speaker, “Integrated inventory, analysis and assessment of ecosystems: Human and biophysical dimensions,” University of Idaho, October, 1997, Moscow (honorarium)

Invited speaker, Workshop on recreation fee programs, Idaho Department of Parks and Recreation, Boise, Fall, 1997

Invited guest speaker, “Miracle at Work Forest Tour” Idaho opinion leaders tour, Idaho forest Products Commission, September, 1997, Riggins, Idaho

Member, Federal-State Land Management Task Force, State of Idaho, nominated by the Governor's office, 1996-appointed chair of Legal Subcommittee, Feb. 1997. Resigned, April, 1998.

Moderator for two sessions of the Cecil Andrus Center for Public Policy conference on the bull trout, June, 1995.

Guest column on public land transfers, Idaho Statesman, June 25, 1995.

Lecturer and moderator, Wittenburg Summer Writing Project, Albertson's College of Idaho, June, 1995, 1997

Moderator of symposium on timber policy for the Timber Tornado event of the Hemingway western Studies Center, BSU, October, 1994.

Speaker to Golden K Kiwanis, Boise, Jan. 1995.

Speaker, national meeting of the Public Lands Foundation, Boise, September, 1994.

Speaker, Lewis and Clark College seminar for mid-career land management professionals, Boise, March, 1995.

"Ecosystem Management and the Colorado Plateau" talk given at the symposium Grand Canyon: Towards a Geography of Hope, Flagstaff, AZ, October, 1994

Outside consultant to the National Park Service on public land policy, Tucson, Arizona, April 1994. Report submitted, fall, 1994, to the Vail working group.

Testimony to the joint hearings of the Idaho House and Senate Resources Committees, Boise, January, 1994.

Speaker, Regional Chief Rangers Conference, National Park Service, Boise, Idaho, October, 1991.

Speaker, Midwest Chief Rangers Conference, National Park Service, Las Vegas, Nevada, March, 1992.

Participant, Management Effectiveness Study, Idaho Department of Fish and Game, July, 1992.

Speaker, Idaho Environmental Professionals meeting, Boise, Idaho, June, 1992.

Speaker, Idaho Public Affairs Officers meeting of the U.S. Forest Service, Boise National Forest, Boise, Idaho, May, 1992.

Speaker, Public Affairs/Public Administration Conference, Intermountain Region, U.S. Forest Service, Salt Lake City, Utah, Feb. 1992.

Speaker, "Fettucine Forum," downtown lunch forum, Boise, Idaho, Feb. 1992.

Managers’ Impact on Organizational Performance” presented at the annual meeting of the Southwest Political Science Association, April 2003 in San Antonio, Texas.

Teaching Experience

Spring 2006: PubAdm 550-The Executive and the Administrative Process- Boise State University

Fall 2005: PubAdm 501-Public Policy Process-Boise State University

Summer 2005: POLS 342-Politics and the Bureaucracy-Texas A&M University.

Spring 2004: BUSH 689-Public Management in the George Bush School of Government and Public Service, Professor Anthony Bertelli. Guest Lecturer-empirical models of public management- Texas A&M University.

Fall 2003: POLS 346-Honors American Government, Professor James E. Anderson. Guest Lecturer-how media affects political perceptions-Texas A&M University.

Research and Technical Experience

Fall 2005-Present: Director, Applied Research Center, Boise State University.

Fall 2005-Present-Principle Investigator, Treasure Valley State of the Region Project.

Fall 2005-Collaborator-17th Annual Idaho Public Policy Survey

October 2005-February 2006: Consultant (with Ross Burkhart) on survey and analysis of the Idaho Department of Health and Welfare related to management. Report to be released to the Idaho State Legislature February 27, 2006.

Assistantships

Graduate Assistant Lecturer Summer 2005-Solo instructor for the Politics and the Bureaucracy undergraduate class.

Editorial Associate Summer 2003-Summer 2004, for the *American Journal of Political Science*

Duties: Receive and prepare manuscripts for review, process and update reviewer information

Research Assistant Summer 2004-Fall 2004, for Professor Norman Luttbeg

Duties: Collect data and run statistical analyses, interpretation of data, and content analysis

Research Assistant Spring 2003-Fall 2004, for Professor James E. Anderson.

Duties: Collect data, content analysis, and guest lecture

Research Assistant Fall 2002, George Bush School of Government and Public Service, Institute for Science, Technology and Public Policy.

Duties: Collect data and perform stakeholder analyses along the Texas Gulf Coast

Service

Department Library Representative-Spring 2006-present-Boise State University.
Reviewer: *American Journal of Political Science*

Computing Resources Committee, Texas A&M University 2003-2004

Idaho Department of Environmental Quality: Pollution Prevention Intern 2001-2002
Volunteer for the Boy Scouts of America, Troop 913, College Station, Texas

Professional Memberships

Public Management Research Association
Midwest Political Science Association
American Society for Public Administration
Association for Public Policy Analysis and Management Association

Academic Awards and Honors

Phi Kappa Phi

Career Objective To utilize my past experience in business and the knowledge I have gained through my Masters in Public Administration degree in order to work in the public policy arena.

Work Experience

Boise State University, Boise, ID. (9/04 to present)

Assistant Director – Energy Policy Institute (EPI) -- Responsible for the successful startup and administration of a newly formed policy research institute within the Department of Public Policy.

- Planned and coordinated the delivery of an energy policy class to employees at the Idaho National Laboratories. Assists in research and instruction.
- Developed relevant energy policy questions included in the 17th Annual Idaho Public Policy Survey. Published and presented results to state lawmakers.
- Wrote and won grant proposals required to fund EPI for fiscal year 2006.
- Currently providing adjunct instruction in Organizational Theory for the Department of Public Policy and Administration.

Graduate Assistant – Social Science Research Center -- Led and managed various projects for the SSRC.

- Managed and completed the 16th Annual Idaho Public Policy Survey to aid state lawmakers in understanding public opinion on relevant policy issues.
- Developed a strategic plan for the startup of the Energy Policy Institute.

Albertsons, Inc., Boise, ID. (10/03 to 11/04)

Senior Business Process Designer -- Facilitated, designed, and documented strategically significant business processes.

- Facilitated a team of directors to design and implement a process for developing and introducing corporate brand products.
- Lead a team of consultants, vice presidents, and high level business associates in the design of 16 core business processes that integrated marketing, category management, and supply chain functions.
- Led the development and design of a global sourcing process that created an ocean network supply chain, product assortment selection process, and purchasing processes.
- Led the development of training, standards, and methodology for documenting and improving business processes. Personally trained over 100 business analysts, program managers, and system analysts.

Jabil Circuit, Inc., Boise, ID. (6/98 to 7/02)

Materials Process Development Manager -- Managed team of 7 Subject Matter Experts responsible for first line escalation support of decision support tools and systems (SAP, Webplan, etc.), process development and improvement, and developing and administering training for over 150 employees.

- Led SAP system implementation for Jabil Idaho. Included Materials Management, Production Planning, Finance, Controlling, Quality, and Sales & Distribution. Implementation completed within five months.
- Fully developed curriculum and technical training for Planning, Inventory Control, and Purchasing departments. Administered training and registration using Web based tools.
- Successfully managed SAP upgrade from 3.0 to 4.0

Planning and Inventory Control Manager -- Managed Inventory Control Department developing over 100 employees responsible for shipping, receiving, and storing over \$40 million in inventory. Simultaneously managed planning department with over 15 employees responsible for determining customer demand and build schedules for 10 production lines.

- Managed a ½ million dollar monthly budget to within +/- 10% plan-to-actual.
- Developed positive working relationships with four new customers in order to design, customize and manage their supply chains. Achieved 98% On-time Delivery.
- Developed processes in inventory control to achieve 99.9% inventory accuracy.
- Managed startup of Production and Inventory Control departments including hiring and training of personnel and transition from HP inventory and planning systems to Jabil legacy system.

Value Delivery System Improvement, Inc., Boise, ID. (5/97 to 6/98)

Enterprise Engineer/President -- Provided facilitation, project management, and training to organizations requiring improvement in their ability to deliver value to customers and business.

- Facilitated a team of 20 employees in the redesign of an order generation and fulfillment process for a graphic arts and printing facility. Lead times reduced from 30 to 2 days.
- Significantly improved order fulfillment process for a custom order precision casting foundry. Capacity and lead times improved by 40% in less than five months.
- Provided workshops and facilitation for implementing “Lean and Agile Manufacturing.”
- Facilitated numerous strategic planning sessions for various clients.

Hewlett-Packard Co., Boise Printer Div., Boise, ID. (7/92 to 5/97)

Production / Transition Manager -- Managed Production Business Unit and Inventory Control with 60+ employees while integrating them into a new team based system.

Process Development Engineer -- Developed and managed capacity/demand management and shop floor control processes and systems to improve capacity utilization and on-time delivery.

Deltronics de Matamoros, Mexico, S.A. DE C.V. (5/91 to 8/91)

Project Manager / Trainer -- Facilitated development of a transition plan and managed implementation to attain synchronous manufacturing flow of a car audio manufacturing facility.

Purdue University, West Lafayette, IN. (8/90 to 5/92)

Technical Assistance Program Consultant -- Provided consultation to Indiana businesses to improve their competitiveness.

Teaching Assistant -- Assisted in the instruction of a master's level production control class.

Research Assistant -- Performed a comparative analysis of deterministic and stochastic queuing theory models.

Delco Electronics, Div. of Hughes Elec., Kokomo, IN (5/85 to 8/90)

Production/Project Manager -- Had overall responsibility to meet cost, quality, and delivery objectives for a Production Department with 40 plus employees.

Facilitated a Union-Management team to determine work rule changes and wage restructuring to improve competitiveness.

Education

Purdue University, West Lafayette, IN -- B.S. (5/85) and M.S. (5/92) in Industrial Engineering. Concentration in manufacturing systems and engineering economics. Masters project completed to develop econometric models for evaluating demand-side management programs for the electric power industry.

Boise State University, Boise, ID -- Masters in Public Policy and Administration (12/05). GPA = 4.0

Training

Kepner Tregoe Project Management, Creative People Management, TQC Facilitator Training, BFR Leadership Training, Process of Management Training, Performance Problem Solving for Teams, How to Sell your Ideas, Performance Management Training, Giving and Receiving Feedback, Quality Engineering I and II, Behavioral Interviewing, SAP Academy Training

Honors and Activities

Activities: Idaho Humane Society Volunteer, Big Brothers and Big Sisters of Idaho Volunteer, Idaho Parks and Recreation Volunteer, Biking, Skiing; **Honors:** Certified SAP Consultant in Sales and Distribution, Owens Corning Academic Scholarship, Alpha Pi Mu Industrial Engineering Honorary, Phi Kappa Phi Honorary, Pi Alpha Alpha MPA Honorary.

"No man needs sympathy because he has to work. Far and away the best prize that life offers is the chance to work hard at work worth doing." Theodore Roosevelt

EDUCATION:

Master of Public Administration: Boise State University, 2004. Emphasis in natural resource policy and the environment.

Bachelor of Business Administration, Economics: Boise State University, 1986.

Course work and independent study includes courses in public sector HR management; public sector budgeting; ethics; regulatory environments; administrative rulemaking; the public policy process; variety of supervisory and management development courses; intensives in negotiation and contracting; mass/interpersonal communication, public relations; personal and business communications; marketing and public relations for business and consumers; strategic planning; integrated business management; financial management; project management; Total Quality Management; customer relationship management; creativity; team building; research methods; and many other specific and general business topics over the past 25 years. Courses taken to enhance proficiency in Microsoft Office suite of software applications, as well as various other analytic/research/presentation applications.

EXPERIENCE:

Communication and presentations:

Professional background in communications and marketing. Received extensive training and development of public speaking while in the private sector. Provide various presentations of public policy survey and other research results. Professional speaking in front of diverse groups ranging from undergraduate students, technology forum, political candidates forum, and nonprofit organizations. Managed all marketing/PR communications at Ore-Ida for Foodservice division; managed business-to-business and consumer communications for various units at HP; proficient at public speaking, presentations and written communications. Poised, confident and engaging speaker and facilitator.

Budget and finance: Responsible for preparing, defending, implementation and management of business unit budget and profitability of \$12 million unit at Ore-Ida Foods; directly supervised a staff of 7 and a department of 14 employees. Included forecasting, P&L responsibility, and expense management. During various assignments at Hewlett Packard, tasked with budget and FTE forecast and resulting accountability. Analyzed program tradeoffs, negotiated and advocated for funding for programs at HP. Currently have complete budget responsibility and accountability as executive director of a nonprofit. Recently completed budget request cycle for local and appropriated funding for SSRC at BSU. Accountable for all department revenues/expenses and FTE management by project grant as director of research center under effort reporting system. Employed in various management positions requiring planning, resource management, program implementation and financial management since 1978.

Analysis: Most recently planned, implemented, analyzed, reported and presented the 14th and 15th Annual Idaho Public Policy Survey for Boise State University; supervised 16th. Provided analysis of 15 years of policy survey data for Candidates Forum, August 2004. Perform or supervise analysis and publication of research projects at SSRC to provide actionable information from data. Managed qualitative and quantitative research, data analysis, and presentations to senior management/board at Ore-Ida. Responsible for integrating research

data into marketing plans/product launch plans at HP. Proficient at locating and using secondary data sources to augment primary research.

Understanding of public sector and regulatory environment: Work experience in private, public and nonprofit sectors. Performed large-scale, statewide workforce (WIA) research/consulting project for Idaho Department of Labor 2003. Currently developing an economic/workforce development research pilot project for local economic development council. Have extensive understanding of public administration in variety of regulatory climates as public sector employee, coursework, and through nonprofit board/voluntary sector experience.

Client service orientation: TQM and customer relationship management beliefs and skills acquired in private sector put into practice in public and nonprofit realms. Led customer relationship management/enhanced customer support effort for LaserJet Divisions at HP; planned and implemented first integrated customer service efforts at HP; developed customer service and relationship program for Ore-Ida Foodservice Division.

Managing/leading programs/projects: 'Co-owner' of collaborative effort at Hewlett-Packard to integrate 41 worldwide customer relationship management programs into one program for the business-to-business units. Project required integration across consumer and business-focused units and significant surrender of 'turf' by in-country managers. Responsible and accountable for program measurement and success. Currently manage multiple projects/clients for research center and for private consulting business. Board chair of nonprofit with oversight of all programs and projects.

Collaborative/team player: Managed three collaborative, cross-disciplinary teams at Ore-Ida as Brand Manager/Advertising Manager; volunteered for successful (experimental) self-managed work unit at HP; built strong client/agency partnership for integrated communications work at Ore-Ida and HP; preferred work group style is self-managed team.

WORK HISTORY:

Boise State University. 2002 to present. **Projects Manager, Social Science Research Center**, College of Social Sciences and Public Affairs. Providing primary research and analysis for the public and nonprofit sectors, including various annual Idaho Public Policy Surveys.

npc consulting, LLC, 2001 to present. **Principal/owner.** Providing business planning, strategic planning, business management, capacity building, fundraising and marketing to nonprofits and small business.

Choices in Community Giving, Inc., 2002 to present. **Executive Director.** Hired to facilitate merger/acquisition, strategic planning for stability and growth as a start-up. Report to a board of 30+ member organizations.

Hewlett-Packard Company, 1992 through 2001. Various management and supervisory positions of increasing responsibility and authority in marketing, communications, business planning, customer relationship management and IT. Final position: Worldwide Business Unit Consultant/Engineer, Customer Relationship Management.

Ore-Ida Foods, Inc., 1976 through 1992. Various staff, supervisory and business unit management positions of increasing responsibility and authority in logistics and marketing. Responsibilities spanned forecasting, financial planning/analysis, budgeting, and P&L responsibility. Final position: Advertising Manager/Base Brand Unit Marketing Manager, Foodservice Sales and Marketing.

Selected Civic Engagement/Voluntary Activities:

Idaho Conservation League, Current Board Chair. Recruited to chair board of directors of a leading Idaho conservation organization, specifically to build board capacity. Nurtured and led first strategic planning initiatives

in the organization during prior board term. Wrote communications plan and hired organization's Director of Communications. Working to build statewide support for current congressional delegations' efforts to introduce two wilderness bills this session.

North End Neighborhood Association, Past Board Chair. Led largest, oldest, and influential voluntary organization through period of active civic engagement, testifying, organizing, and collaborating with various city, county and state entities to retain quality of life in Boise's oldest historic neighborhoods.

Appendix B: Deliberation Day Background Information

Background on a Citizen Deliberation Day and Deliberative Polling

Based on the work of James S. Fishkin, the Janet M. Peck Chair in International Communication and director of the Center for Deliberative Democracy at Stanford University.

Our founding fathers were troubled that citizens were generally uninformed about public issues, or not sufficiently reflective to rule themselves. James Madison defined a solution: ‘refine and enlarge the public views’ by making deliberation a key part of the design of the American democratic republic. Unfortunately, we have come to rely on the ‘unfiltered voices’ of the mass public, (or possibly the voices of political elites cut off from the masses.)

George Gallup, of the famed public opinion polls, had a vision for using opinion polls to complement democracy. He envisioned the citizens listening to the issues in the media, discussing and weighing options, and then voicing their ‘considered opinion’. Most of us now realize that much public opinion is formed by headlines and ‘sound bytes’. Anthony Downs, a political economist of the 1950s called the problem “rational ignorance”. Why would people spend precious time and effort to become informed about complex policy issues? And, we are often made aware of the public’s low level of information on a variety of issues.

Surveys and polls do have shortcomings aside from those mentioned above. Some people don’t like to admit that they don’t know about something. Rather than say, “I don’t know”, many will simply express whatever opinion comes to mind. Another modern limitation is that people would rather discuss politics and policy with people similar to themselves. Rather than risk unpleasant disagreements, culturally, we seek out those from similar social spheres and those with similar views.

This is not an indictment of all polling. If implemented correctly, surveys and polls can provide an accurate assessment of opinion on a topic. However, the responses to polls may not reflect *considered judgments*; inaccuracy may not be a result of the techniques of polling, but a reflection of how we practice democracy. Even George Gallup showed that informal, unofficial changes in democratic practice can influence the way public opinion shapes our politics and our policy.

James Fishkin (and his colleague Bruce Ackerman) began a project that they call “Deliberative Polling” to create ‘A Nation in a Room.’ The process is straightforward. Rather than suffice with a one-stage poll, a series of ‘interventions’ are used. First, a baseline poll is taken. Respondents are then provided balanced background materials about the issues for study. A statistically representative sample of that surveyed sample is invited to deliberate in small and large groups for a day. Several surveys are completed throughout the day and at the end of the event. The key to participation is to convince participants that their voices matter, according to Fishkin. What he has documented (in over 50 large-scale instances) is that *the process matters*. The microcosm gathered for a Deliberative Polling event achieves Gallup’s vision, but in a way that people can reasonably believe that their voices do matter in the process.

The process overcomes the problems with conventional polling named earlier: participants are motivated to become informed; the opinions expressed are real, informed responses; and, citizens are exposed to alternative, sometimes opposing, views (and not merely allowed to selectively learn what they already ‘knew’). The Deliberative Poll creates a public space where people can reason together, despite fundamental disagreements on an issue. Discussions held in a safe public space with random samples,

randomly assigned, accomplishes what Madison, Gallup and Fishkin believe to be the democratic ideal for policy setting.

Here is an example, provided by Fishkin, that relates directly to citizen involvement in setting energy policy:

“In the Deliberative Poll, ordinary citizens are effectively motivated to consider competing arguments, to get their questions answered, and to come to a considered judgment. Even if they do not have opinions when first contacted, many will form them by the end of the process. In 1996 I was contacted by some electric companies in Texas who faced a new requirement that they consult local residents as part of their planning. Were they going to use coal, natural gas, or renewable energy (wind or solar power)? Would they try to reduce the need for more power through conservation? The companies could not assess public opinion through conventional polls because their customers did not have enough information to have formed real, stable opinions about the issue. But if they consulted focus groups or small discussion groups, they knew that they could never demonstrate to regulators that such small groups were representative. And if they held town meetings, open to everyone, they would get lobbyists and organized interests in the room, not the mass public.

They concluded that Deliberative Polling offered a better solution. We put together a committee of stakeholders representing all the major constituencies to supervise the effort of creating briefing materials, a questionnaire, and an agenda for the weekend. This advisory committee included consumer groups, environmental groups, advocates of alternative energy and more conventional energy sources, and representatives of the large customers. We required events to be public and transparent; the weekend process was televised in the service area, and the public-utility commissioners participated.

The results were striking. In eight Deliberative Polls conducted in various parts of Texas and nearby Louisiana, the public went for shrewd combinations of natural gas, renewable energy, and conservation. The overall percentage of people willing to pay more on their monthly utility bill to support renewable energy went from 52 to 84 percent. The percentage willing to pay more for conservation went from 43 to 73 percent. All the resulting plans included substantial investments in renewable energy—transforming Texas into the second leading state (after California) in wind energy. Undoubtedly, many of the opinions expressed at the end replaced “non-attitudes” (Converse’s term) or phantom opinions. But the point is that the opinions expressed in the end were the considered judgments of representative microcosms: they provided a window on what the public would think under good deliberative conditions.”
