## IN THE HOUSE OF REPRESENTATIVES

## HOUSE CONCURRENT RESOLUTION NO. 43

## BY RESOURCES AND CONSERVATION COMMITTEE

## A CONCURRENT RESOLUTION

STATING FINDINGS OF THE LEGISLATURE THAT EXISTING CONDITIONS RELATING TO WOLVES DEFINE AN EMERGENCY CONDITION FOR ALL RURAL IDAHOANS AND, IN THE FACE OF THIS EMERGENCY, THE LEGISLATURE ENCOURAGES THE GOVERNOR OF THE STATE OF IDAHO TO DECLARE THAT A STATE OF EMERGENCY EXISTS IN IDAHO AND TO AUTHORIZE AND REQUIRE THE IDAHO DEPARTMENT OF FISH AND GAME TO USE ANY MEANS TO REDUCE WOLF NUMBERS TO THOSE DESIGNATED FOR RECOVERY OF THE SPECIES.

Be It Resolved by the Legislature of the State of Idaho:

WHEREAS, wolf populations have grown to a level of over eight times the number designated for recovery of the species in Idaho and no effective management plan exists for reducing wolf populations to the number designated for recovery of the species; and

WHEREAS, growing and unacceptable levels of wolf predation against livestock and pets exist and many claims relating to losses by wolves are not fully compensated; and

WHEREAS, wolf packs have moved into densely populated areas and unnecessarily large numbers of wolves constitute a threat, not only to property, but to human life itself, with particular threat to children; and

WHEREAS, the time and costs expended in an effort to protect livestock against wolf attacks is never compensated; and

WHEREAS, people living in most rural parts of the state are threatened by wolves and must change their habits and lose the safe use of, and travel upon, their own property. Individuals must now arm themselves to face the threat of growing, unchecked numbers of wolves in many parts of the state; and

WHEREAS, unchecked numbers of wolves are destroying the culture and heritage of rural Idahoans including, but not limited to, their use of real estate, their use of hounds for legal hunting of big game, their livelihood in professional hunting, such as outfitting and guiding, and their choice of type and location of livestock animals for food production and recreation; and

WHEREAS, excessive wolf populations reduce livestock production through direct loss of life and loss of productivity, with higher costs to producers, which creates devaluation of established livestock businesses in areas of high wolf populations; and

WHEREAS, excessive numbers of wolves are hindering recovery of elk populations in parts of the state, are reducing the big game populations available to hunters in the state, and are preventing the Idaho Department of Fish and Game from exercising its mandate to manage big game for the benefit of hunters in the state; and

WHEREAS, in 2006, Governor Jim Risch issued Executive Order No. 2006-32, finding that there was an imminent threat to the health of wild elk herds,

as well as to the public health and safety of the citizens of Idaho, due to escape of domestic elk from the Conant Creek Facility in eastern Idaho and ordered the Idaho Department of Fish and Game to "identify and shoot on site, any domestic elk that have escaped from the Conant Creek Facility." The large number of wolves in the state presents a far greater threat.

NOW, THEREFORE, BE IT RESOLVED by the members of the Second Regular Session of the Sixtieth Idaho Legislature, the House of Representatives and the Senate concurring therein, that the above described conditions define an emergency condition for all rural Idahoans and, in the face of this emergency, the Legislature hereby encourages the Governor of the State of Idaho to declare that a state of emergency exists in Idaho and to authorize and require the Idaho Department of Fish and Game to use any legal means to reduce wolf numbers to those designated for recovery of the species.
