Starting Salary: \$55,000 – \$70,000 DOE - [Plus Competitive Benefits!](#)

Location(s): Boise

SPECIAL NOTIFICATION: This position is exempt from classified state service and the rules of the Division of Human Resources and the Idaho Personnel Commission.

The Legislative Services Office is accepting applications for the position of

Full-time IT Programmer Analyst – Database Specialist (DBS) to join the Application Development team in the Information Technology Division. The successful candidate will have the opportunity to conduct application analysis and design, program in a variety of languages, and monitor and maintain a variety of relational databases (Oracle, MySQL and Microsoft SQL). We offer training to stay current in your technical area of expertise. The successful candidate will work with a great team of application developers and share the DBS responsibilities with another team member.

Our mission: critical application is written in Java EE, Oracle and XML; we also have applications written in ASP.NET and C#. Object oriented analysis and/or design, JAVA programming, relational database experience and Bachelor in Computer Science are required. Knowledge of Linux, XML and Oracle desired. This is a rewarding opportunity for a candidate that has a positive attitude, exceptional programming and database skills, and a passion for building and maintaining quality software.

RESPONSIBILITIES:

- Perform/support all aspects of applications programming;
- May maintain and modify vendor software packages;
- Resolve programming problems and determine appropriate solutions;
- Develop new and/or maintain existing programs;
- Share knowledge by effectively documenting work;
- Stay current with changes in technical area of expertise (training maybe provided);
- Work with the team to develop and maintain a thorough knowledge of the assigned application(s), functional area(s) or project(s);
- Respond quickly and effectively to production issues and take responsibility for seeing those issues through resolution;
- Develop reports using, but not limited to, JasperReports, Microsoft Word, and Microsoft Excel;
- Resolve database performance, capacity issues, replication, and other distributed data issues;
- Manage and assist with backup and recovery of databases using RMAN and/or Network Appliance Snapshots;
- Manage security of databases and data held within databases;
- Develop database procedures, triggers, and SQL scripts;
- Design and implement highly available production systems using Real Application Cluster (RAC) and Oracle Enterprise Manager; install and maintain database software and patches;
- Other duties as assigned.

MINIMUM QUALIFICATIONS: Bachelor's degree in Computer Science, experience in object oriented application development, programming in JAVA; design, develop, implement, and maintain Enterprise Java applications; write programming specifications/documentation. Knowledge of data modeling concepts and relational database definitions. Experience performing programming, design, and analysis with database applications; using multiple data storage and data retrieval systems.

Required Experience: Object oriented application development, programming in JAVA EE, design, develop,

implement, and maintain Enterprise Java applications; writing programming specifications/documentation. Experience writing applications with relational databases; strong SQL skills, 2-5 years' overall experience in information systems with Oracle database experience.

Desired Experience: Internet related technologies such as web design/programming using WordPress, PHP, JavaScript, and HTML. Linux, JAVA EE, Version Control, Oracle JDeveloper IDE; Oracle WebLogic Server, JasperReports, Apache Tomcat, Apache Web Server, and XML Schema.

TO APPLY: Mail or e-mail cover letter, resume, and professional references to:
