

STATEMENT OF PURPOSE

RS18260

When the Seland College of Applied Technology at Boise State University transfers its employees to the College of Western Idaho, those employees will no longer be state of Idaho employees. This bill will ensure that those former state employees do not lose their accrued sick leave because of this transfer. This statute will apply to transfers occurring on or before September 1, 2009. The bill has a sunset date of September 2, 2009.

FISCAL NOTE

Boise State will no longer be responsible for employer contributions to the sick leave fund (under section 67-5333, Idaho Code) for these employees. College of Western Idaho will commence contributions to the unused sick leave fund according to section 33-2109A, Idaho code. For actuarial and investment purposes, the liabilities and assets of state and community college employers are currently combined so there is no net impact of this transfer to the unused sick leave fund.
