

STATEMENT OF PURPOSE

RS19016

This legislation provides school districts with temporary flexibility on the use of certain local school building maintenance funds. Before receiving such flexibility, school districts must first address any recommendations contained in each school building's most recent school safety inspection, conducted by the Division of Building Safety. After this, half of the remaining maintenance funds could be used for other one-time purposes, excluding personnel costs.

FISCAL NOTE

No fiscal impact to the state. It could provide local school districts with additional flexibility in the use of up to \$9.9 million.
