

STATEMENT OF PURPOSE

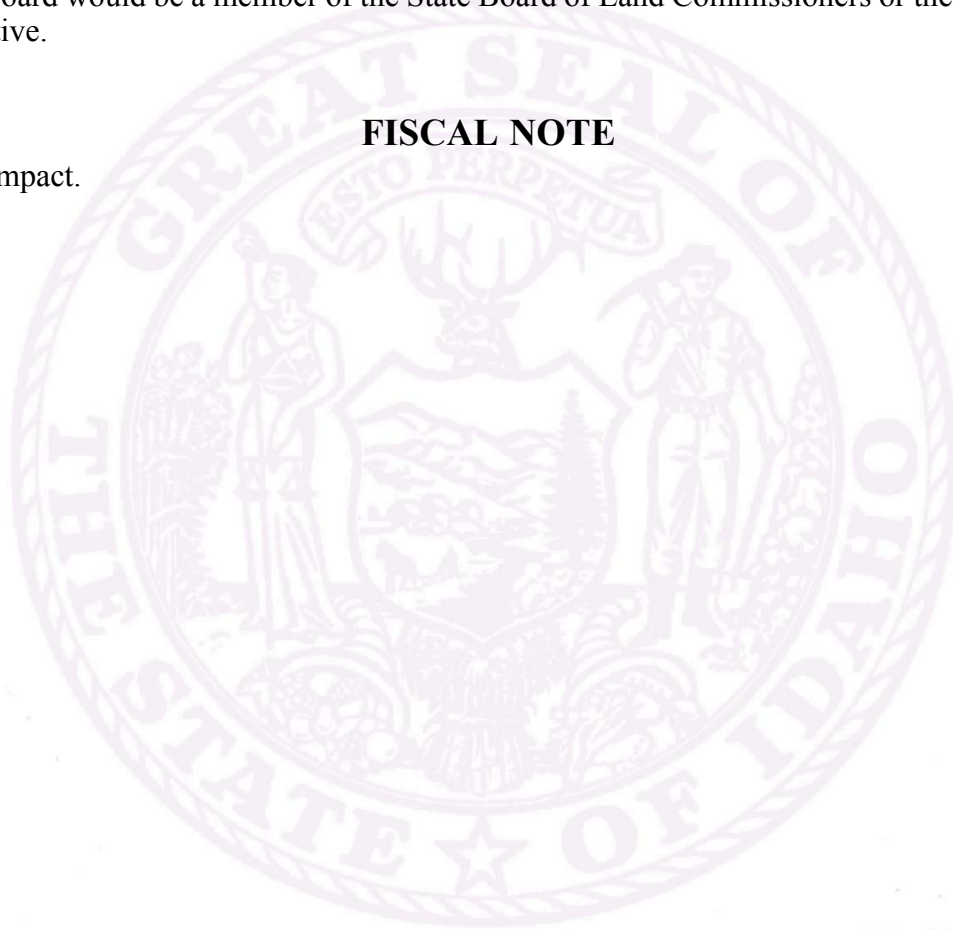

RS19136

The current language in Idaho Code 47-201 appears to require a member of the State Board of Land Commissioners to serve on the Idaho Geological Survey Advisory Board. However, it would be more efficient and effective for either the Director of the Department of Lands or department staff trained in geology or mining to represent the Land Board. This has been past practice.

This proposed legislation would amend Idaho Code 47-201 so that membership requirements for the Land Board would be a member of the State Board of Land Commissioners or their designated representative.

FISCAL NOTE

No fiscal impact.
