

**STATEMENT OF PURPOSE**

**RS19451C1**

This legislation eliminates the charge for a dock permit required for replacement of a previously permitted dock for a single or two family home when the replacement dock is of equal or less size of the existing dock and is in the same location.

**FISCAL NOTE**

The Department does not anticipate that many encroachments per year will fall into this category, and expects only a small reduction in General Fund Revenue (ranging from \$2,000 to \$5,000 per year...as a best guess). The Department would gain the opportunity cost of applying personnel and operating expenses to higher priority regulatory work.
