

IN THE HOUSE OF REPRESENTATIVES  
HOUSE CONCURRENT RESOLUTION NO. 40  
BY AGRICULTURAL AFFAIRS COMMITTEE

1 A CONCURRENT RESOLUTION  
2 STATING THE FINDINGS OF THE LEGISLATURE, ENCOURAGING HEALTHY, LOCALLY GROWN  
3 FOOD PRODUCTION, DISTRIBUTION AND CONSUMPTION IN THE STATE OF IDAHO,  
4 SUPPORT OF LOCAL FARMING, THE CONSUMPTION OF LOCALLY GROWN FOODS AND  
5 THE PROMOTION OF GREATER FOOD SELF-SUFFICIENCY WITHIN THE STATE, AND  
6 FURTHER ENCOURAGING IDAHOANS AND IDAHO BUSINESSES TO CELEBRATE AND  
7 GET TO KNOW THEIR LOCAL GROWERS AND TO PURCHASE AND CONSUME MORE FOOD  
8 PRODUCED IN OR NEAR IDAHO.

9 Be It Resolved by the Legislature of the State of Idaho:

10 WHEREAS, the State of Idaho recognizes the industriousness of Idaho  
11 farmers and ranchers throughout Idaho's history who have been and continue  
12 to be of major importance to the state's economy; and

13 WHEREAS, with Idaho's climate, soil and water, farmers and ranchers  
14 have created an agriculture that is famous around the world and Idaho-raised  
15 vegetables, fruits, grains, meats, dairy and eggs have an outstanding  
16 reputation for quality and flavor; and

17 WHEREAS, in the years preceding 1960, Idaho farmers grew a large per-  
18 centage of the food eaten in the state. There has, however, been a steady  
19 shift away from Idaho's food self-sufficiency. Today a majority of the food  
20 eaten by Idahoans is not from Idaho, creating an unhealthy reliance on other  
21 regions of the United States and the world. Idahoans are spending millions  
22 of dollars annually on food that is grown or produced elsewhere, and it is  
23 prudent for the economy and state jobs to keep those dollars in Idaho; and

24 WHEREAS, locally produced food makes farming more economically vi-  
25 able, keeps farmers in business, provides new agricultural opportunities,  
26 promotes stewardship of resources and saves valuable farmland from develop-  
27 ment. When a farmer is producing food that will not travel a long distance,  
28 a shorter shelf life allows the farmer to experiment and diversify, making  
29 farming more profitable and providing consumers with more choices. Produce  
30 purchased locally has often been picked within 24 hours and such freshness  
31 not only improves the taste of food, but also the nutritional value of food  
32 which declines over time; and

33 WHEREAS, populations whose diets are high in fruits and vegetables ex-  
34 perience better health, with lower rates of obesity and related chronic con-  
35 ditions. The ability to grow, sell and easily obtain a consistent, adequate  
36 supply of fresh, local food can increase food security and empower families  
37 and communities to be more healthy and self-sufficient; and

38 WHEREAS, states across the United States are increasingly focusing on  
39 providing healthy, locally grown food supplies for their residents by devel-  
40 oping local food policies that encourage investment in local food-related  
41 jobs and infrastructure, community gardens, as well as better relation-  
42 ships with farmers in their region. The growing local food interest has  
43 increased demand among Idaho residents for healthy, locally grown foods and

1 strengthened interest in developing partnerships between urban consumers  
2 and regional growers; and

3 WHEREAS, small business is the backbone of Idaho's economy and local  
4 food production can help promote entrepreneurship and self-sufficiency in  
5 Idaho's small towns, revitalizing regional small farms, creating local  
6 jobs, business opportunities and the recirculation of capital within Idaho.  
7 Idaho has already undertaken beginning steps to increase the amount of  
8 locally grown food available to Idaho consumers through the Idaho Department  
9 of Agriculture's Idaho Preferred™ program and the University of Idaho  
10 Extension Service has undertaken steps to encourage family food production  
11 through such programs as Master Gardeners, Master Food Preservers, Master  
12 Composters and Victory Garden.

13 NOW, THEREFORE, BE IT RESOLVED by the members of the Second Regular  
14 Session of the Sixtieth Idaho Legislature, the House of Representatives  
15 and the Senate concurring therein, that in order to promote the economic  
16 vitality and public health and safety of Idaho communities, provide incen-  
17 tives for job creation, attract economic investment, increase state per  
18 capita income, support the future of agriculture and promote the health and  
19 economic security of Idaho citizens and communities, it encourages healthy,  
20 locally grown food production, distribution and consumption in the State of  
21 Idaho.

22 BE IT FURTHER RESOLVED that it encourages the support of local farming  
23 and the consumption of locally grown foods as a means for protecting our  
24 region's agricultural land, topsoil, genetic diversity and the skills upon  
25 which we all rely for our sustenance and survival.

26 BE IT FURTHER RESOLVED that it encourages the promotion of greater food  
27 self-sufficiency within the state and the recognition that it is in the best  
28 interests of Idaho families, Idaho businesses and our state's economy to  
29 further this self-sufficiency. It also encourages all Idahoans and Idaho  
30 businesses to celebrate and get to know their local growers and to purchase  
31 and consume more food that is produced in or near Idaho and their own kitchen  
32 pantries and dinner tables.
