Subject: Opportunity to Comment on Energy Priorities for the State of Idaho

Hi Elliot,

We need to end the bondage of petroleum energy and the petroleum companies.

We need to allow scientists to R&D zero point energy.

If scientists were allowed to research and develop without fear for their lives and the welfare of their families, our society would have an abundance of ***FREE ENERGY...!!!***

If you would like to know of people who have R&D zero point energy already, please let me know and I'll send you websites to check out.

Thanks for staying on top of "Energy Priorities for the State of Idaho" and including us in the discussion.

Sincerely,

Susie Alvord
Boise
