

Dear Mr. Nugent:

I saw something on the new Energy Plan and read the Snake River Alliance's comments on the issue. I am e-mailing because I want to voice my support on the side of the Snake River Alliance.

I believe that Idaho really should be forward thinking in regards to developing renewable energy sources and that the new Energy Plan should not be rapidly forced through by special interest groups with lots of monetary-backing. Idaho needs energy that will be renewable and fair to everyone as well as the environment.

Thank You!

Sincerely,

Debey Sklenar
