

STATEMENT OF PURPOSE

RS19926C1

This bill amends statutes related to the powers and duties of the Information Technology Resource Management Council ("ITRMC"), the Department of Administration's information technology powers and duties, to carry out its information technology and telecommunications duties.

Section 67-5745C, Idaho Code, is amended to eliminate the requirement that ITRMC maintain an inventory of information technology systems in the state, as this is a duplication of individual agency efforts.

Section 67-5747, Idaho Code, is amended to add information technology to references to communications equipment as a majority of communications equipment and systems include an information technology component or are information technology based. The inclusion of "information technology" also makes the language consistent with sections 67-5745 through 67-5748, Idaho Code.

FISCAL NOTE

No General Fund impact.
