

STATEMENT OF PURPOSE

RS19961

Section 39-8610, Idaho Code, limits the ability to issue a temporary certificate to operate to one (1) sixty (60)-day period. This is in conflict with Section 39-8618, Idaho Code, which allows the Division of Building Safety and the owner to enter into a compliance agreement where practical difficulties would prevent discrepancies being corrected in the sixty (60)-day time period. As long as the parties are acting in good faith, additional time could be allowed where there were no life safety issues involved. This change would allow extensions of the temporary certificate to operate where the situation was warranted. Additionally, the phrase "permanent certificate" is replaced with the more correct "five year certificate."

FISCAL NOTE

Negligible adverse impact.
