

STATEMENT OF PURPOSE**RS21010**

The purpose of this legislation is to improve the flexibility in driver license and identification card renewal processes to better accommodate those who are temporarily out-of-state. The legislation also reduces the inconvenience of retesting requirements to those who have inadvertently allowed their driver's license to expire; and modifies statutory language related to driver license and identification card extensions to align with current practice.

These changes will improve operations at county driver licensing offices and at the Transportation Department by reducing exception processing and retesting requirements and customer complaints.

FISCAL NOTE

No fiscal impact. Revising the statute now will allow the Transportation Department to design and build new DMV automated systems with the new requirements included and at no additional cost.
