

STATEMENT OF PURPOSE

RS21246

The purpose of this bill is to update Idaho child enticement laws to more closely match technological trends that exist in today's society. The current law does not clearly specify that children can be enticed electronically in many ways other than the Internet. Our society and technology have progressed to the point where communication exists in multiple forums through a myriad of devices, which the current law does not adequately address. This legislation will update the law regarding these issues.

FISCAL NOTE

There is no known fiscal impact to the general fund. Application would depend upon discretion of local law enforcement and prosecutorial agencies as would occur with any criminal prosecution.
