

To the Fed Lands Interim Committee,

I am writing in regards to the issue of transferring Fed public lands to the state of ID. A little over two years ago I moved my wife and three little boys to ID from Kansas. One of the big reasons I moved was the large amounts of public lands my family could enjoy different activity's on here in ID. In Kansas there is very little public lands to fish, hunt and enjoy other outdoor activity's. I think one of the main strengths this great state of ID has is its large tracks of public lands that residences and non-residences alike can enjoy. I hope you consider this and not transfer these Fed lands to the state.

Thank You
