Gentlemen;

To-date Federal management of America's Public Lands has been abusive & dictatorial at best.

The rights & restrictions placed on responsible citizens & financial welfare of our nation under the false global warming data submitted by so-called environmentalist groups is a corporate & politically funded ploy to control america's mineral assets & drive up prices.

The Idaho legislatures voting records on abusive takings laws such as Idaho's Forced Annexation Law & the overthrow of Citizen's Vote for Term Limits validates that Idaho politicians are not to be trusted. the Corporate Cartel of Lobbyists not the people have control over taxation, it's disposition & private property rights.

Idaho legislators, our governor & other state governments also support via the Federal EB-5 Agenda the selling of american citizenship to Communist Chinese officials so they can obtain valuable mineral claims on U.S. soil. This effort was slowed in Idaho after a number of us exposed the political sell-out of Idaho to a hostile nation.

Our politicians & their 'political association affiliates' have also discussed the selling-off of Public Lands, to supposedly pay down the irresponsible debts they have created.

Ownership of public lands would undoubtedly go to the same Cartel of lobbyists now controlling local, state & federal politics.

Our Public Lands must remain in hands & control of the-people.

It's clear the massive financial abuses of taxpayer dollars by local, state & federal government officials will not be resolved until the-people start strictly enforcing Oaths of Office Contracts.

Voting records on constitutionally abusive legislation & laws provide the undeniable evidence necessary for citizens to immediately oust criminal & treasonous officials.

Widespread political & corporate conflict of interest conflicts prevents any lawful disposition changes in our Public lands.

For many years the Idaho legislature has rejected Ethics Reform in the same manner they rejected the-people's Vote for Term Limits.

History reflects that dictators & corrupt politicians never reform themselves. Restoring & enforcing a return to constitutional law, order & justice is the sole responsibility of the people.

Chuck Thomas
