

STATEMENT OF PURPOSE

RS21794

This legislation lowers the amount of a person's earnings that can be garnished for back-taxes to twenty five percent (25%). When higher levels of garnishment occurs, people are forced to leave their employment and go where they can earn enough to meet their family's needs.

FISCAL NOTE

The fiscal impact is unknown and may cause a small decrease in collections, but the amount collected in the long-run should increase, as people would be able to remain at their jobs and pay their back-taxes to the state.
