

STATEMENT OF PURPOSE

RS21981

This legislation will prevent Idaho school districts from having to use Idaho taxpayer funds to educate out-of-state students who are placed in Idaho group homes.

FISCAL NOTE

State savings would be minimal, based on average daily attendance-driven funding of \$4,160 per enrolled pupil. Local school district savings would be more significant, based on an average expenditure of over \$28,000 per pupil for such students in the state's largest school district, but more varied, depending on how many out-of-state students were placed in group homes within the school district's boundaries.
