The legislation also streamlines language defining when an unloaded or disassembled gun can be concealed in a vehicle and clarifies the instances when a concealed weapon permit is necessary for carrying a concealed weapon.

Rep. Barbieri spoke **in support** of the motion and stated it is essential for an individual to be able to protect themselves at any time and restrictions are arbitrary.

H 511: **Rep. Morse** presented **H 511**, a bill that establishes privacy standards for, and definitions of biometric data collected by private entities. Some private businesses are obtaining, analyzing, and transferring private biometric information. This bill requires safeguards for data that is collected, by requiring written notice to the subject, and obtaining written consent to collect such data. It informs the subject of the specific purpose of the data collection. It prohibits private entities from selling, trading, or transferring or profiting from the transfer of private biometric data. No private entity may disclose or copy, transfer private biometric data unless the subject consents to the disclosure, and such information is necessary for a contractual transaction, is required by law, or is required by a warrant. A private entity in possession of private biometric data must store the data securely by employing a reasonable standard of care. The bill further provides for a right of action for damages in the event of breach of these protections for a minimum of \$1,000 or actual damages, plus reasonable attorney's fees and costs. This act does not apply to the admission of evidence in Court, nor the storage or retention of medical records mandated by any state or federal law.

In response to committee questions, **Rep. Morse** stated government entities do not work under the standards in the bill. He said there are multiple layers of government and analyzing and deciding what information would be included would be very complex. He said private entities are the issue because of the threat of selling biometric data for a profit. He said pawn shops and lenders take fingerprints which could be sold to others. He stated there are various types of identifiers that are used to conduct transactions and are sometimes done without the person knowing or agreeing to it. This bill would prevent that information from being sold or traded. He stated there are HIPPA laws in place to protect people at the federal level. He stated the penalty would be liquidated and actual damages, civil damages, whichever is greater. He said private entities would fall into the scope of becoming liable for damages if they take a sample of someone's biometric data, test it, link it to identifying information and sell it.
