

STATEMENT OF PURPOSE

RS23573C1

The amendments to the construction managers and general contractors (CM/GC) provided in this bill give guidance to public owners about the use of the CM/GC contracting method. It provides safeguards to ensure taxpayers are protected from unscrupulous contractors who may use the CM/GC method to their own advantage. It also provides subcontractors protections to ensure they have fair opportunities to participate on Idaho public works projects. This bill will put minimal but important rules around the new CM/GC law. The changes will put important limits that have been proven in other states to protect both taxpayers and subcontractors in cases where the CM/GC delivery method is used.

FISCAL NOTE

This bill has no impact to the State General Fund and should result in significant savings to those public entities (school districts, cities, counties, the State) engaged in construction projects.
