

STATEMENT OF PURPOSE

RS23807

This bill amends Section 3 of H168 which appropriated additional money to the Superintendent of Public Instruction for broadband and related services for public schools. This bill allows the state to reimburse school districts for additional costs they incurred due to their reliance on the state contract that is void under current litigation.

FISCAL NOTE

House Bill 168 appropriated \$3,640,500 for the procurement of broadband services and necessary equipment. Any additional allowable services provided for by this act will be paid, either in whole or pro-rated, from this existing appropriation. Any unexpended moneys will revert to the General Fund.
