

STATEMENT OF PURPOSE

RS23925

This legislation follows HB 262 and replaces HB 171 to establish requirements for liability insurance coverage for transportation network companies and their participating drivers. A transportation network company is a company that provides prearranged transportation services for compensation using an online-enabled application or platform to connect passengers with drivers using their personal vehicle. The legislation requires transportation network companies to provide information to their participating drivers on the statutory requirement for insurance, the insurance coverage provided by the company and to advise that the driver's personal automobile insurance policy will not provide coverage. The legislation also exempts services provided without profit from the definition of "transportation network company" in HB 262.

FISCAL NOTE

There is no fiscal impact to the state or to local government.
