

STATEMENT OF PURPOSE

RS23250C2

The amendment corrects inconsistencies in platting and mapping requirements. Plats and Record of Survey (ROS) maps are required to have the same minimum features such as North arrow, graphic scale, and bearing and distances for better consistency. Plat and ROS map media requirements are updated and made consistent in all three (3) sections of Idaho Code to remove outdated media specifications. Requirements are changed to list only the most current corner record on the ROS map to make it more concise. A technical correction insures monuments set by Idaho licensed land surveyors are protected from defacement.

The amendment allows graduate and related science students to take the Fundamentals of Engineering (FE) examination prior to graduation, instead of after graduation. It also simplifies the application process to make it easier for all students to take fundamentals of engineering or fundamentals of surveying examination. Students will take the examination without first applying to the board. After passing the examination, they then will apply to the board for their intern certificate.

FISCAL NOTE

There is no impact to the General Fund or to the dedicated funds of the Board of Professional Engineers and Professional Land Surveyors.
