

## **STATEMENT OF PURPOSE**

### **RS24270**

The Online Voting Registration Act creates a safe, secure, and efficient system for online voter registration. An online voter registration process will increase the number of registered voters and voter participation in elections, reduce county election costs, increase the completeness and accuracy of voter rolls, and protect against voter fraud.

### **FISCAL NOTE**

Immediately after implementation, counties will realize significant savings of up to \$200,000. In the first year, the impact to the state general fund will be an estimated \$350,000 to integrate the Idaho Department of Motor Vehicles' and Secretary of State's systems.
