

STATEMENT OF PURPOSE

RS25461

The proposed legislation creates a new section of Idaho Code to provide incentive funding for Career Technical Education (CTE) secondary programs in the five CTE education program of: Business Management and Marketing, Engineering and Technology, Family and Consumer Sciences, Health Professions, and Skilled and Technical Sciences. This legislation would expand incentive funding opportunities currently available only for Agricultural and Natural Resources education programs pursuant to section 33-1629. Under the proposed legislation, the Division would provide incentive based funding to the identified high performing programs. The Division would also provide funding for programs in need of additional support and technical assistance in any of the six program areas, including Agricultural and Natural Resource (technical assistance funding is currently not available under section 33-1619). This performance-based approach would more clearly demonstrate the return on investment provided by career technical education and hold CTE programs more accountable for producing results. The performance measures and procedures for CTE program incentive based funding would be established by the Idaho Division of Career Technical Education and approved by the State Board of Education.

FISCAL NOTE

The Fiscal impact of the proposed legislation is contingent on appropriation by the Legislature. It was requested by the Division of Career Technical Education that the proposed legislation be funded at \$325,000 for fiscal year 2018.
