

STATEMENT OF PURPOSE

RS26837

An increasing amount of government contracts require the use of computers, a virtual office, or online activity. There is an increasing recognition of the difficulty in verifying hours worked on computers for government contracts. This legislation intends to establish a secure and transparent process to verify hours worked on computers for government contracts to encourage accountability, prevent abuse and overbilling. It further authorizes the Department of Administration in conjunction with the Office of Information Technology services to promulgate rules or develop procedures to implement the requirements and provides a sunset.

FISCAL NOTE

No fiscal impact to the state as any costs associated with requirements are the responsibility of the contractor. Additionally there are potential savings to the state in increased productivity.
