

STATEMENT OF PURPOSE

RS26821

Charter schools are public schools supported by taxpayer dollars, but too many of those dollars flow right out of the classroom to make interest payments on bonds. Traditional public schools have access to financing tools that help lower interest rates on bonds. This bill would create a similar tool to help seasoned, stable public charter schools obtain lower interest rates on bonds so more taxpayer money can stay in the schools.

FISCAL NOTE

There is no required expenditure from the general fund. However, this bill calls for creating a separate fund in the state treasury to give lenders comfort that if no other money is available, there is a backstop to cover a potential missed payment. The legislature may appropriate new money or transfer from existing funds for this purpose, and no minimum or specific amount is required. Additionally, participating schools are required to pay an amount equal to two basis points into the fund.
