

STATEMENT OF PURPOSE

RS28296 / S1039

Career technical education programs provide students the opportunity to develop professional and technical skills to prepare them for workplace readiness. Identifying additional ways for students to demonstrate these skills is important for employers. The Workplace Readiness Diploma provides districts the ability to provide an additional designation for graduates who have successfully completed a career technical education program of study and demonstrated proficiency in the identified areas. This legislation also encouraged districts to explore opportunities to provide math, English, and other credits to be earned through an applied, CTE program setting.

FISCAL NOTE

There is little or no fiscal impact to the state or school districts.
