Agency Summary & Statutory Authority

EMERGENCY MEDICAL SERVICES (EMS) plans and implements a statewide system designed to respond to critical illness/injury situations, including disasters. The program is responsible for EMS personnel training; ambulance licensing; emergency medical technicians (EMT) and other EMS personnel certification; operation of the statewide EMS communications center; technical assistance and grants to community EMS units; evaluation of EMS system performance; and overseeing the public health preparedness and response program.

Appropriation versus Actual Expenditures

Four-Year Average Expenditures

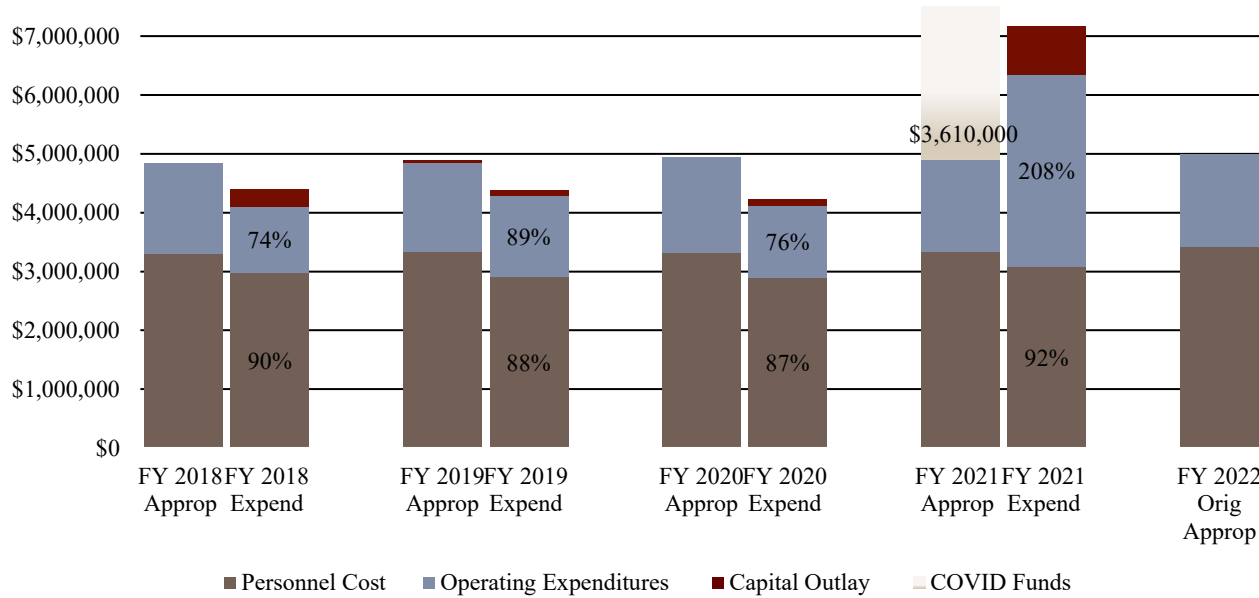

- The Division of Public Health is authorized 259.02 FTP
 - Emergency Medical Services Program has 42.84 FTP or 17% of the Division’s authorized FTP
- Five Main Service Areas
 - Licensing EMS personnel and services; operation of the EMS State Communications Center (StateComm); providing technical assistance and resources to EMS agencies; supporting a statewide system of care for trauma, stroke, and heart attack (TSE); and planning and coordination of the public health response to acts of bioterrorism, infectious disease outbreaks, and other public health threats and emergencies
- In response to COVID-19:
 - EMS provided the structure and systems behind the state response
 - Stood up the Emergency Operations Center, implemented existing response plans, developed real-time response plans, convened partners to discuss logistical and operational needs, and partnered with the Idaho Office of Emergency Management and the Federal Emergency Management Agency (FEMA) to secure funding and resources

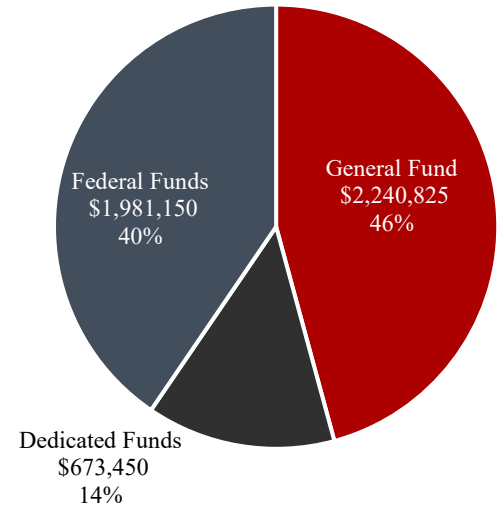

Agency Summary & Statutory Authority

LABORATORY SERVICES is one of several basic support systems administered by the Division of Public Health for a variety of physical health programs, environmental control programs, and other divisions and programs of the department. Laboratories provide testing, inspection, training, and outreach to the local district health departments and other departments of state government, in accordance with written agreements.

Appropriation versus Actual Expenditures

Four Year Average Expenditures

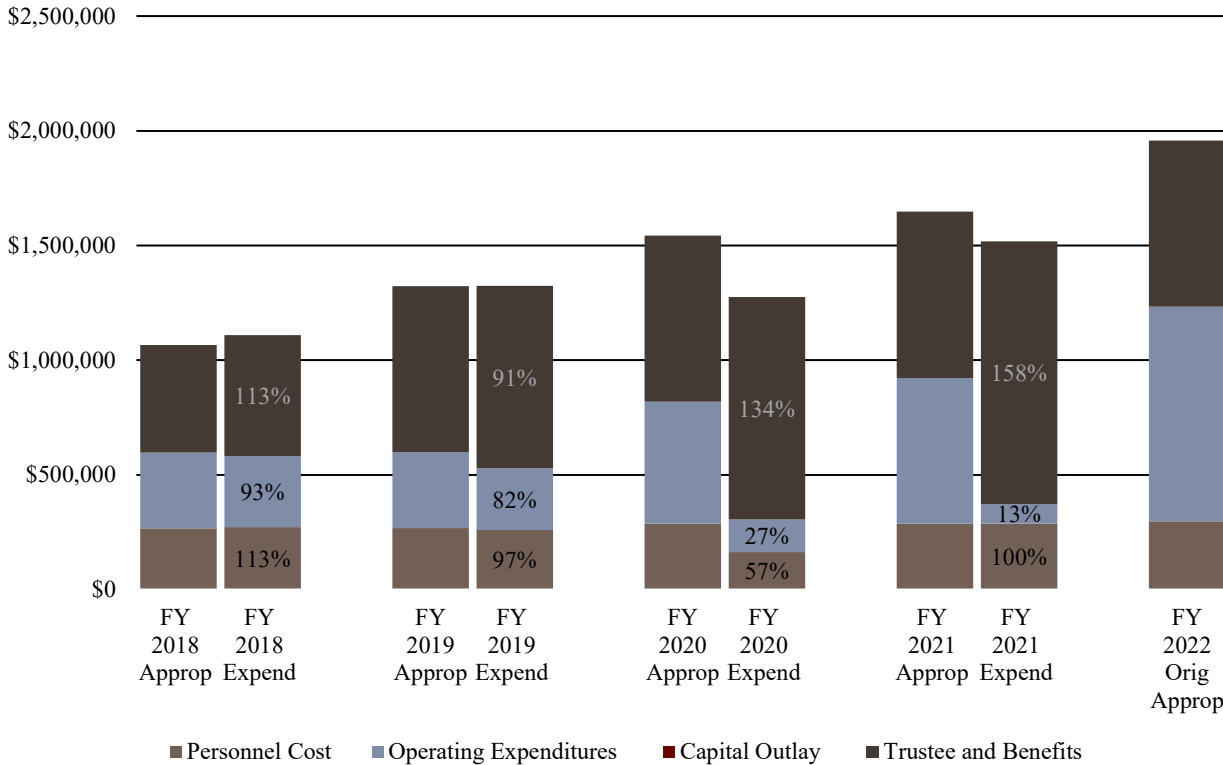

- The Division of Public Health is authorized 259.02 FTP
 - Laboratory Services Program has 39.00 FTP or 15% of the Division’s Authorized FTP
- Four core service areas
 - Testing: Communicable disease; contaminants in drinking water, soil, or food
 - Inspection: clinical and drinking water labs; x-ray and mammography units; air quality stations
 - Training: continuing education workshops, webinars; student internships for college credit
 - Outreach: coordination of the Idaho Sentinel laboratory network, for rapid detection of biothreats; “Ground Water Quality Near Me” interactive map; participation in public safety drills, exercises, and events with Regional Response HazMat Teams and the 101st Civil Support Team
- In response to COVID-19:
 - One of the first labs in the country able to conduct SARS-CoV-2 testing
 - Manages all aspects of testing, including performing testing as well as providing guidance and training to other labs across the state

Agency Summary & Statutory Authority
