

# Rules Governing Dead Animal Movement and Disposal IDAPA 02.04.17

Dr. Scott Leibsle Administrator - Division of Animal Industries

*Attachment 5 - January 17, 2023*

## Regulatory Scope

This rule governs **when**, **how** and **where** a livestock carcass can be disposed of to minimize the impact to public health and the environment.

**When:** Within **72 hours** of knowledge of the death of the animal

**How:** Burial, Rendering, Landfill, Composting, Chemical Digestion, Incineration, Burning, Natural Decomposition

**Where:** 300 ft from residences/water wells; 200 ft from surface water; 100 ft from public roadways; 50 ft from property lines

# Negotiated Rulemaking Meetings

- Public meetings were conducted via video conference
- Multiple industry stakeholders participated in both meetings
- No comments were submitted to the rulemaking record outside of the rule meetings

March 15, 2022

April 6, 2022

Attachment 5 - January 17, 2023

## Summary of Rule Changes

- IBR - Composting Best Management Practices
- Section 30.02 (pg 3) - Animals known to be infected with a **prion disease** (CWD, BSE, Scrapie, etc) must notify ISDA prior to disposing of the carcass
- Section 30.04 (pg 3) - Setback requirements for carcasses buried near **surface water** do not apply if the water is **elevated or up-gradient** from the carcass (i.e. – irrigation ditch)
- Red Tape Reduction (multiple sections)
