

Part I – Agency Profile

Agency Overview

The Idaho Legislature created the Idaho State Department of Agriculture (ISDA) in 1919 to assist and regulate the state's agricultural industry. The primary purposes for establishment were to protect Idaho's crops and livestock from the introduction and spread of pests and transmittable diseases, to help provide the industry with a system for the orderly marketing of agricultural commodities, and to protect consumers from contaminated products or fraudulent marketing practices. These purposes still drive the department today.

The department derives its statutory authority from multiple sections of the Idaho Code. Section 22-101 creates the Department of Agriculture and the position of director. Section 22-102 provides that the director "shall organize the department into such divisions and other administrative sub-units as may be necessary in order to efficiently administer the department," and section 22-103 lists specific directorial duties. Title 22 also contains the authority for the Plant Industries Division, the Agricultural Resources Division, and the department's Marketing Bureau. The primary authority for the Animal Industries Division lies within Title 25 and Title 37, while the Agricultural Inspections Division, which includes the Bureaus of Weights and Measures and Bonded Warehouse, derives authority from Titles 69 and 71.

In addition to the five divisions which primarily make up the ISDA, four commodity commissions—the Idaho Honey Advertising Commission, Idaho Hop Commission, Idaho Mint Commission and Idaho Sheep and Goat Health Board—are also technically housed within the ISDA, although each entity maintains its autonomy. The department works closely with all other agriculture commodity commissions. The Idaho Food Quality Assurance Laboratory was assigned by the Idaho Legislature to the Department of Agriculture on July 1, 2005. In addition, the ISDA Bureau of Laboratories was established within the agency to manage all six ISDA laboratories.

The Idaho State Department of Agriculture has a current budget of approximately \$50 million. For FY2022, the state general fund accounts for 25 percent of the budget. The remainder of the department's funding comes from various types of fees assessed directly to the segment of industry being regulated or receiving services. Federal sources also assist the department with the funding of certain programs. The department is currently staffed with approximately 300 full-time employees. The Bureau of Shipping Point Inspection and other units of the department also hire hundreds of seasonal employees each year.

Idaho agriculture has been the engine of our state's economy, and the department embraces each new opportunity and stands ready to provide leadership.

Core Functions/Idaho Code

- **Animal Health:** Responsible for regulatory animal disease control and prevention programs through the inspection and investigation of livestock and livestock facilities; and the regulation of movement of animals in intrastate, interstate and into international commerce.
- **Plant Health:** Responsible for the registration and inspection of commercial feed, fertilizer and soil and plant amendments; export certifications; pest exclusion; control of grasshoppers and Mormon crickets; prevention and control of noxious weeds and invasive species.
- **Inspection Services:** Inspect commodities for quality and condition at the shipping point, using official grade standards developed by the United States Department of Agriculture (USDA) and ISDA for fresh fruits and vegetables. Also inspect and certify organic operations, all weighing devices and licensed warehouses.
- **Pesticide:** Regulate the use and distribution of pesticides through inspections and investigations; registration of pesticides; monitoring of ground and surface water for pesticides; disposal of unusable pesticides; inspection of chemigation systems; training of pesticide trainers, handlers, and workers; and licensing and training of certified pesticide applicators and chemigators.

- Market Development:** Market and promote Idaho food, beverage, and agriculture companies and products to increase sales and economic sustainability. The division conducts both domestic and international programs providing direct assistance to farmers, ranchers, shippers, and processors in establishing new customers for their products, increasing sales, and stimulating growth of Idaho’s economy.

Performance Measure Explanatory Notes

ⁱ The Sheep and Goat Health Board collected this data for FY2017.

ⁱⁱ Failure to become licensed is due to failure to pass competency exams, non-payment and/or failure to provide proof of insurance (as required for professional applicators only).

ⁱⁱⁱ Number of applicants refused renewal because they did not submit renewal documents within 12-months of previous licenses expiration date, non-payment and/or failure to provide proof of insurance (as required for professional applicators only).

^{iv} Previous consumer awareness studies were conducted with federal funding. The grant requirements have changed and the study has not been conducted recently. ISDA is currently looking at the cost and feasibility of conducting a study through other means.
