#### What is an Al agent?

An Al agent is an application that uses a combination of a generative model's capabilities, tools to connect to the external world, and high-level reasoning to achieve a desired end goal or state.

### It's time for an Al driven transformation in Government

#### Google Al for Public Sector

Meet public sector missions safely, efficiently, and responsibly with Google AI for Public Sector.

#### Google Al for Public Sector

#### **10xing Constituent Experiences**

Your site, your data, all accessible through a virtual agent, powered by Google AI, that communicates, translates, and takes action.

#### **Employee Superpowers**

An Al powered mentor sitting beside every employee helping them search, summarize, and understand

#### **Expertise on Demand**

Imagine having access to security experts, data analytics experts, translators, & software developers at all times without the human premium.
