

REVISED

STATEMENT OF PURPOSE

RS33347 / S1297

The purpose of this legislation is to establish safety standards for conversational artificial intelligence services, defined here as AI applications designed primarily to simulate human conversation. It requires operators to adopt protocols for responding to both adult and minor users. Where an operator has actual knowledge or reasonable certainty that a user is a minor, the bill mandates a persistent disclaimer of AI interaction. It also prohibits "gamification" intended to encourage excessive engagement and requires measures to prevent sexually explicit content. The bill also requires an operator to provide parental supervision tools.

FISCAL NOTE

This legislation causes no increase or decrease in revenue, or additional expenditure of funds at the state or local level of government; therefore, this legislation has no fiscal impact.
