CHAPTER 57
IDAHO TELEHEALTH ACCESS ACT

54-5701. SHORT TITLE. This chapter shall be known and may be cited as the "Idaho Telehealth Access Act."

[(54-5701) 54-5601, added 2015, ch. 121, sec. 1, p. 308; am. and redesign. 2016, ch. 47, sec. 26, p. 121.]

54-5702. LEGISLATIVE FINDINGS. The legislature hereby finds the following:

(1) Telehealth services enhance access to health care, make delivery of health care more cost-effective and distribute limited health care provider resources more efficiently.

(2) Citizens with limited access to traditional health care may be diagnosed and treated sooner through telehealth services than they would be otherwise, resulting in improved health outcomes and less costly treatments due to early detection and prevention.

(3) Telehealth services address an unmet need for health care by persons who have limited access to such care due to provider shortages or geographic barriers.

(4) Telehealth services provide increased capacity for appropriate care in the appropriate location at the appropriate time to better serve patients, providers and communities.

(5) When practiced safely, telehealth services result in improvement in health outcomes by expanding health care access for the people of Idaho.

[(54-5702) 54-5602, added 2015, ch. 121, sec. 1, p. 308; am. and redesign. 2016, ch. 47, sec. 27, p. 121.]

54-5703. DEFINITIONS. As used in this chapter:

(1) "Asynchronous store and forward transfer" means the transmission of a patient's health care information from an originating site to a provider at a distant site over a secure connection that complies with state and federal security and privacy laws.

(2) "Distant site" means the site at which a provider delivering telehealth services is located at the time the service is provided.

(3) "Originating site" means the location of a patient at the time telehealth services are provided, including but not limited to a patient's home.

(4) "Provider" means any health care provider who is licensed, required to be licensed, or, if located outside of Idaho, would be required to be licensed if located in Idaho, pursuant to title 54, Idaho Code, to deliver health care consistent with his or her license.

(5) "Synchronous interaction" means real-time communication through interactive technology that enables a provider and a patient at two (2) locations separated by distance to interact simultaneously through two-way video and audio or audio transmission.

(6) "Telehealth services" means health care services provided by a provider to a person through the use of electronic communications, information technology, asynchronous store and forward transfer or synchronous interaction between a provider at a distant site and a patient at an origin-
in ating site. Such services include but are not limited to clinical care, health education, home health and facilitation of self-managed care and caregiver support, and the use of synchronous or asynchronous telecommu-
nications technologies by a provider to deliver patient health care services, including but not limited to assessment of, diagnosis of, consultation with, treatment of, and remote monitoring of a patient; transfer of medical data; patient and professional health-related education; public health services; and health administration. The term "telehealth services" does not include audio in isolation without access to and review of the patient's medical records, electronic mail messages that are not compliant with the health insurance portability and accountability act (HIPAA), or facsimile transmissions.

(7) "Telehealth technologies" means synchronous or asynchronous telecommu-
nications technologies capable of assisting a provider to deliver patient health care services, including but not limited to assessment of, diagnosis of, consultation with, treatment of, and remote monitoring of a patient; transfer of medical data; patient and professional health-related education; public health services; and health administration.
